Cumulative Tables of Contents (1959-1967)

1959, Volume 63D, Journal of Research of the National
Bureau of Standards—Section D. *Radio Propagation*.
Editor: James R. Wait

No. 1—July-August

Preliminary results of the National Bureau of Standards radio and ionospheric observations during the International Geophysical Year. David M. Gates.....	1
Origin of [OI] 5577 in the airglow and the aurora. Franklin E. Roach, James W. McCaulley, and Edward Marovich.....	15
Comparison of absolute intensities of [OI] 5577 in the auroral and subauroral zones. F. E. Roach, J. W. McCaulley, and C. M. Purdy.....	19
Origin of "very-low-frequency emissions." R. M. Gallet and R. A. Helliwell.....	21
Climatology of ground-based radio ducts. Bradford R. Bean.....	29
Power requirements and choice of an optimum frequency for a world-wide standard-frequency broadcasting station. A. D. Watt and R. W. Plush.....	35
Measurements of phase stability over a low-level tropospheric path. M. C. Thompson, Jr., and H. B. Jones.....	45
System loss in radio wave propagation. Kenneth A. Norton.....	53
Mode expansion in the low-frequency range for propagation through a curved stratified atmosphere. H. Bremmer.....	75
Transmission and reflection by a parallel wire grid. Martin T. Decker.....	87
Synoptic variation of the radio refractive index. B. R. Bean and L. P. Riggs.....	91
Low-frequency propagation paths in arctic areas. A. D. Watt, E. L. Maxwell, and E. H. Whelan.....	99

No. 2—September-October

Stratification in the lower ionosphere. C. Ellyett and J. M. Watts.....	117
Effect of small irregularities on the constitutive relations for the ionosphere. K. G. Budden.....	135
Ionospheric investigations using the sweep-frequency pulse technique at oblique incidence. Vaughn Agy and Kenneth Davies.....	151
Fields in electrically short ground systems: an experimental study. A. N. Smith and T. E. Devaney.....	175
Diffraction of electromagnetic waves by smooth obstacles for grazing angles. James R. Wait and Alyce M. Conda.....	181
Very-low-frequency radiation spectra of lightning discharges. W. L. Taylor and A. G. Jean.....	199
Radio-wave scattering by tropospheric irregularities. Albert D. Wheelon.....	205
Study at 1046 megacycles per second of the reflection coefficient of irregular terrain at grazing angles. Raymond E. McGavin and Leo J. Maloney.....	235
Synoptic study of the vertical distribution of the radio refractive index. B. R. Bean, L. P. Riggs, and J. D. Horn.....	249

No. 3—November-December

Radio-refractive-index climate near the ground. B. R. Bean and J. D. Horn.....	259
Path antenna gain in an exponential atmosphere. W. J. Hartman and R. E. Wilkerson.....	273
Effect of atmospheric horizontal inhomogeneity upon ray tracing. B. R. Bean and B. A. Cahoon.....	287
On the correlation of solar noise fluctuations in harmonically related bands. L. R. O. Storey.....	293
A monochromatic low-latitude aurora. F. E. Roach and E. Marovich.....	297
Pattern synthesis for slotted-cylinder antennas. James R. Wait and James Householder.....	303
Central Radio Propagation Laboratory exponential reference atmosphere. B. R. Bean and G. D. Thayer.....	315
Excitation mechanisms of the oxygen 5577 emission in the upper atmosphere. E. Tandberg-Hanssen and F. E. Roach.....	319
A method for measuring local electron density from an artificial satellite. L. R. O. Storey.....	325

1960, Volume 64D, Journal of Research of the National
Bureau of Standards—Section D. *Radio Propagation*.
Editor: James R. Wait

No. 1—January-February

Effect of antenna size on gain, bandwidth, and efficiency. Roger F. Harrington.....	1
Surface-wave resonance effect in a reactive cylindrical structure excited by an axial line source. A. L. Cullen.....	13

Basic experimental studies of the magnetic field from electromagnetic sources immersed in a semi-infinite conducting medium. Martin B. Kraichman.....	21
A very-low-frequency antenna for investigating the ionosphere with horizontally polarized radio waves. R. S. Macmillan, W. V. T. Rusch, and R. M. Golden.....	27
Effects of high-altitude nuclear explosions on radio noise. C. A. Samson.....	37
Measured frequency spectra of very-low-frequency atmospheric. Tatsuzo Obayashi.....	41
Determination of the amplitude-probability distribution of atmospheric radio noise from statistical moments. W. Q. Crichlow, C. J. Roubique, A. D. Spaulding, and W. M. Beery.....	49
Measurements of coastal deviation of high-frequency radio waves. C. W. McLeish.....	57
An exact earth-flattening procedure in propagation around a sphere. Benjamin Y.-C. Koo and Martin Katzin.....	61
Limit of spatial resolution of refractometer cavities. William J. Hartman.....	65
Conference on arctic communication. R. C. Kirby and C. G. Little.....	73
Tropospheric scatter propagation and atmospheric circulations. William F. Moler and D. B. Holden.....	81
Layered earth propagation in the vicinity of Point Barrow, Alaska. Glenn M. Stanley.....	95

No. 2—March-April

Optimum frequencies for outer space communication. George W. Haydon.....	105
The joint use of the ordinary and extraordinary virtual height curves in determining ionospheric layer profiles. L. R. O. Storey.....	111
Measured statistical characteristics and narrow-band teletype message errors on a single-sideband 600-mile-long ultrahigh-frequency tropospheric radio link. E. F. Florman and R. W. Plush.....	125
Impedance of a corner-reflector antenna as a function of the diameter and length of the driven element. A. C. Wilson.....	135
The electric field at the ground plane near a top-loaded monopole antenna with special regard to electrically small L- and T-antennas. H. Lottrup Knudsen and T. Larsen.....	139
Terrestrial propagation of very-low-frequency radio waves, a theoretical investigation. James R. Wait.....	153
Aurora of October 22/23, 1958, at Rapid City, South Dakota. F. E. Roach and E. Marovich.....	205

No. 3—May-June

A theory of radar scattering by the moon. T. B. A. Senior and K. M. Siegel.....	217
A theory of wavelength dependence in ultrahigh frequency transhorizon propagation based on meteorological considerations. Ralph Bolgiano, Jr.....	231
A preliminary study of radiometeorological effects on beyond-horizon propagation. F. Ikegami.....	239
The trade-wind inversion as a transoceanic duct. M. Katzin, H. Pezzner, B. Y.-C. Koo, J. V. Larson, and J. C. Katzin.....	247
An analysis of propagation measurements made at 418 megacycles per second well beyond the radio horizon (a digest). H. B. Jones, J. C. Stroud, and M. T. Decker.....	255
On the calculation of the departures of radio wave bending from normal. B. R. Bean and E. J. Dutton.....	259
On the mode theory of very-low-frequency propagation in the presence of a transverse magnetic field. D. D. Cronbie.....	265
On the theory of reflection of low- and very-low-radiofrequency waves from the ionosphere. J. Ralph Johler and Lillie C. Walters.....	269
Focusing, defocusing, and refraction in a circularly stratified atmosphere. K. Toman.....	287
Response of a loaded electric dipole in an imperfectly conducting cylinder of finite length. Charles W. Harrison, Jr., and Ronald W. P. King.....	289
Impedance characteristics of a uniform current loop having a spherical core. Saburo Adachi.....	295

No. 4—July-August

Relaxation of turbulence theory to ionospheric forward scatter propagation experiments. Albert D. Wheelon.....	301
Propagation at oblique incidence over cylindrical obstacles. M. P. Bachynski.....	311
Diffraction by smooth conical obstacles. H. E. J. Neugebauer and M. P. Bachynski.....	317
Characteristics of 488 megacycles per second radio signals reflected from the moon. B. C. Blevins and J. H. Chapman.....	331
The use of polarization fading of satellite signals to study the electron content and irregularities in the ionosphere. C. Gordon Little and Robert S. Lawrence.....	335
Note on a test of the equivalence theorem for sporadic E propagation. J. W. Wright and T. N. Gautier.....	347
Daytime attenuation rates in the very low frequency band using atmospheric. W. L. Taylor.....	349

	Page		Page
Measured electrical properties of snow and glacial ice. A. D. Watt and E. L. Maxwell.....	357	Observation of F-layer and sporadic-E scatter at VHF in the Far East. K. Miya, T. Sasaki, and M. Ishikawa.....	93
Half-wave cylindrical antenna in a dissipative medium: current and impedance. Ronold King and Charles W. Harrison.....	365	A high-resolution rapid-scan antenna. H. V. Cottony and A. C. Wilson.....	101
Preface to ELF papers		No. 2—March–April	
Some ELF phenomena. E. T. Pierce.....	383	Ionsospheric motions observed with high-frequency back-scatter sounders. Lowell H. Tveten.....	115
Mode theory and the propagation of ELF radio waves. James R. Wait.....	387	Relationship between red auroral arcs and ionospheric recombination. G. A. M. King and F. E. Roach.....	129
Studies of natural electric and magnetic fields. G. D. Garland and T. F. Webster.....	405	Fresnel region fields of circular aperture antennas. Ming-Kuei Hu.....	137
Natural electromagnetic energy below the ELF range. Wallace H. Campbell.....	409	Free-balloon borne meteorological refractometer. John F. Theisen and Earl E. Gossard.....	149
Possible application of the system loss concept at ELF. Kenneth A. Norton.....	413	Weather and reception level on a troposphere link—annual and short-term correlations. L. G. Abraham, Jr., and J. A. Bradshaw.....	155
Measurements of the spectrum of radio noise from 50 to 100 cycles per second. M. Balser and C. A. Wagner.....	415	Initial results of a new technique for investigating sferic activity. Gifford Hefley, Robert H. Doherty, and Robert F. Linfield.....	157
No. 5—September–October		Effect of antenna radiation angles upon HF radio signals propagated over long distances. W. F. Utlaut.....	167
ELF electric fields from thunderstorms. A. D. Watt.....	425	Graphical determination of radio ray bending in an exponential atmosphere. C. F. Pappas, L. E. Vogler, and P. L. Rice.....	175
Field strength measurements in fresh water. Gurdip S. Saran and Gedalia Held.....	435	A formula for radio ray refraction in an exponential atmosphere. G. D. Thayer.....	181
Electrical resistivity studies on the Athabasca Glacier, Alberta, Canada. G. V. Keller and F. C. Frischknecht.....	439	The impedance of a monopole antenna with a circular conducting-disk ground system on the surface of a lossy half space. S. W. Maley and R. J. King.....	183
Amplitude distribution for radio signals reflected by meteor trails. Albert D. Wheelon.....	449	Radio-wave propagation in the earth's crust. Harold L. Wheeler.....	189
Computation and measurement of the fading rate of moon-reflected UHF signals. S. J. Fricker, R. P. Ingalls, W. C. Mason, M. L. Stone, and D. W. Swift.....	455	No. 3—May–June	
On the theory of wave propagation through a concentrically stratified troposphere with a smooth profile. H. Bremmer.....	467	Propagation studies using direction-finding techniques. Edgar C. Hayden.....	197
Polarization and depression-angle dependence of radar terrain return. I. Katz and L. M. Spetner.....	483	Diversity effects on long distance high frequency radio pulse propagation. S. A. Bowhill.....	213
Methods of predicting the atmospheric bending of radio rays. B. R. Bean, G. D. Thayer, and B. A. Cahoon.....	487	Influence of ionospheric conditions on the accuracy of high frequency direction finding. P. J. D. Gething.....	225
Loss in channel capacity resulting from starting delay in meteor-burst communication. George R. Sugar.....	493	Phase difference observations at spaced aerials and their application to direction finding. W. C. Bain.....	229
Elementary considerations of the effects of multipath propagation in meteor-burst communication. George R. Sugar, Robert J. Carpenter, and Gerard R. Ochs.....	495	Research at the National Bureau of Standards applicable to long-distance location and direction-finding problems. R. Silberstein.....	233
Use of logarithmic frequency spacing in ionogram analysis. G. A. M. King.....	501	Design for spinning goniometer automatic direction finding. W. J. Lindsay and D. S. Heim.....	237
Guiding of whistlers in homogeneous medium. R. L. Smith.....	505	Resolution characteristics of correlation arrays. Isham W. Linder.....	245
Propagation of microwaves through a magneto-plasma, and a possible method for determining the electron velocity distributions. A. L. Cullen.....	509	Instrumentation for propagation and direction-finding measurements. Edgar C. Hayden.....	253
On electromagnetic radiation in magneto-ionic media. Herwig Kogelnik.....	515	Brooke variance classification system for DF bearings. E. M. L. Beale.....	255
Radiation and admittance of an insulated slotted-sphere antenna surrounded by a strongly ionized plasma sheath. John W. Marini.....	525	Estimation of variances of position lines from fixes with unknown target positions. E. M. L. Beale.....	263
A contribution to the theory of corrugated guides. G. Pfeifle.....	533	Statistics of a radio wave diffracted by a random ionosphere. S. A. Bowhill.....	275
High-gain, very low side-lobe antenna with capability for beam slewing. Alvin C. Wilson.....	557	Space analysis of radio signals. John B. Smyth.....	293
Shielding of transient electromagnetic signals by a thin conducting sheet. N. R. Ziron.....	563	Effect of receiver bandwidth on the amplitude distribution of VLF atmospheric noise. Forest F. Fulton, Jr.....	299
Cylindrical antenna theory. R. H. Duncan and F. A. Hinchey.....	569	Excitation of VLF and ELF radio waves by a horizontal magnetic dipole. Janis Galejs.....	305
No. 6—November–December		No. 4—July–August	
URSI National Committee Report:		Almost fifty years of URSI. J. Howard Dellinger.....	317
Commission 1. Radio Measurement Methods and Standards.....	591	Power density requirements for airglow excitation by gyrowaves. V. A. Bailey.....	321
Commission 2. Tropospheric Radio Propagation.....	607	On the validity of some approximations to the Appleton-Hartree formula. Kenneth Davies and G. A. M. King.....	323
Commission 3. Ionospheric Radio Propagation.....	629	Amplitude and angular scintillations of the radio source Cygnus-A observed at Boulder, Colorado. R. S. Lawrence, J. L. Jespersen, and R. C. Lamb.....	333
Commission 4. Radio Noise of Terrestrial Origin.....	637	Digital methods for the extraction of phase and amplitude information from a modulated signal. R. S. Lawrence, J. L. Jespersen, and R. C. Lamb.....	351
Commission 5. Radio Astronomy.....	655	Comparison between mode theory and ray theory of VLF propagation. H. Volland.....	357
Commission 6. Radio Waves and Circuits.....	671	Antenna coupling error in direction finders. Charles W. Harrison, Jr.....	363
Commission 7. Radio Electronics.....	751	The electrically short antenna as a probe for measuring free electron densities and collision frequencies in an ionized region. Ronold King, C. W. Harrison, Jr., and D. H. Denton, Jr.....	371
1961, Volume 65D, Journal of Research of the National Bureau of Standards—Section D. Radio Propagation. Editor: James R. Wait		Effect of multiple atmospheric inversions on tropospheric radio propagation. F. H. Northover.....	385
No. 1—January–February		A few observations of the perturbations in the phase of the low-frequency ground wave. J. M. Ross and J. E. Kirch.....	393
Incoherent scattering by free electrons as a technique for studying the ionosphere and exosphere: some observations and theoretical considerations. Kenneth L. Bowles.....	1	Smooth earth diffraction calculations for horizontal polarization. L. E. Vogler.....	397
Radio wave absorption of several gases in the 100 to 117 km/s frequency range. C. O. Britt, C. W. Tolbert, and A. W. Straiton.....	15	On the theory of mixed-path ground-wave propagation on a spherical earth. James R. Wait.....	401
On the theory of diffraction by a composite cylinder. Ralph D. Kodis.....	19	No. 5—September–October	
An atlas of oblique-incidence ionograms (a digest). Vaughn Agy, Kenneth Davies, and Roger Salaman.....	35	Frequency dependence of D-region scattering at VHF. J. C. Blair, R. M. Davis, Jr., and R. C. Kirby.....	417
A new approach to the mode theory of VLF propagation. James R. Wait.....	37	Theoretical scattering coefficient for near vertical incidence from contour maps. H. S. Hayre and R. K. Moore.....	427
East-west effect on VLF mode transmission across the earth's magnetic field. D. Dobrott and A. Ishimaru.....	47	Mutual interference between surface and satellite communication systems. William J. Hartman and Martin T. Decker.....	433
Magneto-ionic propagation phenomena in low- and very-low radiofrequency waves reflected by the ionosphere. J. Ralph Johler.....	53	VHF and UHF signal characteristics observed on a long knife-edge diffraction path. A. P. Baris and R. S. Kirby.....	437
Correlation of monthly median transmission loss and refractive index profile characteristics. B. R. Bean and B. A. Cahoon.....	67	Experimental study of inverted L-, T-, and related transmission-line antennas. Sheila Prasad and Ronold W. P. King.....	449
Characteristics of waveguides for long-distance transmission. A. E. Karbowiak and L. Solymar.....	75	Reflection from a sharply bounded ionosphere for VLF propagation perpendicular to the magnetic meridian. Douglass D. Crombie.....	455
Useful radiation from an underground antenna. Harold A. Wheeler.....	89	Resonance of the space between earth and ionosphere. H. Poverlein.....	465

Observed attenuation rate of ELF radio waves, A. G. Jean, A. C. Murphy, J. R. Wait, and D. F. Wasmundt.....	475	Amplitude distribution for radio signals reflected by meteor trails, II, Albert D. Wheelon.....	241
A note concerning the excitation of ELF electromagnetic waves, James R. Wait.....	481	High resolution pulse measurements of meteor-burst propagation at 41 Mc/s over a 1.295-km path, Robert J. Carpenter and Gerard R. Ochs.....	249
Computation of whistler ray paths, Irving Yabroff.....	485	Ionsospheric irregularities and long-distance radio propagation, H. A. Whale.....	265
On the analysis of LF ionospheric radio propagation phenomena, J. Ralph Johler.....	507	On the role of the process of reflection in radio wave propagation, F. du Castel, P. Misme, A. Spizzichino, and J. Voge.....	273
No. 6—November–December		Correlation between hourly median scattered signals and simple refractivity parameters, Arnett S. Dennis.....	285
The solar wind, E. N. Parker.....	537	Observations of radio wave phase characteristics on a high-frequency auroral path, J. W. Koch and W. M. Berry.....	291
Attenuation coefficients for propagation at very low frequencies (VLF) during a sudden ionospheric disturbance (SID), E. T. Pierce.....	543	Diurnal and seasonal changes in structure of the midlatitude quiet ionosphere, J. W. Wright.....	297
Dipole radiation in a conducting half space, R. K. Moore and W. E. Blair.....	547	Schumann resonances of the earth-ionosphere cavity—extremely low frequency reception at Kingston, R.I. C. Polk and F. Fitch.....	313
Reliability of atmospheric radio noise predictions, John R. Herman.....	565	Propagation of plane electromagnetic waves past a shoreline, J. Bazer and S. N. Karp.....	319
Effects of the ionosphere on VLF navigational aids, W. T. Blackband.....	575	Currents induced on the surface of a conducting circular cylinder by a slot, Gerard Hasserjian and A. Ishimaru.....	335
On the spectrum of terrestrial radio noise at extremely low frequencies, H. R. Raemer.....	581	No. 4—July–August	
The nonsingular embedding of transition processes within a more general framework of coupled variables, John Heading.....	595	Propagation problems with space radio communications, Karl Rawer.....	375
Worldwide VLF standard frequency and time signal broadcasting, A. D. Watt, R. W. Plush, W. W. Brown, and A. H. Morgan.....	617	On the absolute intensity of incoherent scatter echoes from the ionosphere, K. L. Bowles, G. R. Ochs, and J. L. Green.....	395
Design of panoramic ionospheric recorders, L. H. Heisler and L. D. Wilson.....	629	On the forward scattering of radio waves in the lower ionosphere, Tor Hagfors.....	409
A quick method for estimating the stage of the sunspot cycle, W. B. Chadwick.....	637	Representation of diurnal and geographic variations of ionospheric data by numerical methods, William B. Jones and Roger M. Gallet.....	419
Measurements of low-angle radiation from a monopole, Alvin C. Wilson.....	641	Interaction between an obliquely incident plane electromagnetic wave and an electron beam in the presence of a static magnetic field of arbitrary strength, K. H. B. Wilhelmsson.....	439
1962, Volume 66D, Journal of Research of the National Bureau of Standards—Section D. Radio Propagation, Editor: David M. Gates		An analysis of VLF mode propagation for a variable ionospheric height, James R. Wait.....	453
No. 1—January–February		A method for the determination of lower ionosphere properties by means of field measurements on sferics, Frank B. Harris, Jr., and R. L. Tanner.....	463
A survey of the very wide band and frequency independent antennas—1945 to the present, John D. Dyson.....	1	Defocusing of radio rays by the troposphere, Robert E. Wilkerson.....	479
Numerical investigation of the equivalent impedance of a wire grid parallel to the interface between two media, Tove Larsen.....	7	Magnetotelluric fields in the frequency range 0.03 to 7 cycles per kilosecond: Part I. Power spectra, C. W. Horton and A. A. J. Hoffman.....	487
Current on and input impedance of a cylindrical antenna, Yung Ming Chen and Joseph B. Keller.....	15	Magnetotelluric fields in the frequency range 0.03 to 7 cycles per kilosecond: Part II. Geophysical interpretation, C. W. Horton and A. A. J. Hoffman.....	495
Radar corner reflectors for linear or circular polarization, G. Latmire and A. Sposito.....	23	Impedance of a circular loop in an infinite conducting medium, Martin B. Kraichman.....	499
On the theory of wave propagation through a concentrically stratified troposphere with a smooth profile, Part II. Expansions of the rigorous solution, H. Bremmer.....	31	No. 5—September–October	
On the propagation of VLF and ELF radio waves when the ionosphere is not sharply bounded, James R. Wait.....	53	Theory of magnetotelluric fields, James R. Wait.....	509
Fields of electric dipoles in sea water—the earth-atmosphere-ionosphere problem, Wallace L. Anderson.....	63	Propagation characteristics of magneto-ionic plasma columns, D. Formato and A. Gilardini.....	543
Reflection of electromagnetic waves from thin ionized gaseous layers, F. H. Northover.....	73	Dielectric loading of electric dipole antennas, Janis Galejs.....	557
Reflection and transmission of radio waves at a continuously stratified plasma with arbitrary magnetic induction, J. Ralph Johler and John D. Harper, Jr.....	81	Possible influence of the ionosphere on the impedance of a ground-based antenna, James R. Wait.....	563
On the diffraction of spherical radio waves by a finitely conducting spherical earth, Lillie C. Walters and J. Ralph Johler.....	101	Some statistical theory for the analysis of radio propagation data, M. M. Siddiqui.....	571
An approximate full wave solution for low frequency electromagnetic waves in an unbounded magneto-ionic medium, William C. Hoffman.....	107	Auroral sporadic-E ionization, Robert D. Hunsucker and Leif Owren.....	581
VHF radio propagation data for the Cedar Rapids-Sterling, Anchorage-Barrow, and Fargo-Churchill test paths, April 1951 through June 1958, George R. Sugar and Kenneth W. Sullivan.....	113	Comparative study of the correlation of seasonal and diurnal cycles of transhorizon radio transmission loss and surface refractivity, B. R. Bean, L. Fehlhaber, and J. Grosskopf.....	593
No. 2—March–April		Enhancement of the lunar tide in the noon critical frequency of the F_2 layer over the magnetic equator, R. G. Rastogi.....	601
Atmospheric phenomena, energetic electrons, and the geomagnetic field, J. R. Winckler.....	127	Scattering from a conducting sphere embedded in a semi-infinite dissipative medium, Janis Galejs.....	607
The summer intensity variations of [OI] 6300 Å in the tropics, D. Barbier, F. E. Roach, and W. R. Steiger.....	145	High-frequency scattering from a coated sphere, V. H. Weston and R. Hemenger.....	613
Generation of radio noise in the vicinity of the earth, P. A. Sturrock.....	153	Propagation of spherical waves through an ionosphere containing anisotropic irregularities, K. C. Yeh.....	621
Fading characteristics observed on a high-frequency auroral radio path, J. W. Koch and H. E. Petrie.....	167	No. 6—November–December	
Some problems connected with Rayleigh distributions, M. M. Siddiqui.....	175	RF impedance probe measurements of ionospheric electron densities, J. A. Kane, J. E. Jackson, and H. A. Whale.....	641
Impedance of a monopole antenna with a radial-wire ground system on an imperfectly conducting half space, part I, S. W. Maley and R. J. King.....	181	Methods for applying numerical maps of ionospheric characteristics, William B. Jones and Roger M. Gallet.....	649
Theory of the infinite cylindrical antenna including the feedpoint singularity in antenna current, R. H. Duncan.....	189	Very-low-frequency radio propagation in the ionosphere, Daniel W. Swift.....	663
The E-field and H-field losses around antennas with a radial ground wire system, Tove Larsen.....	205	Prolonged space-wave fadeouts in tropospheric propagation, Albrecht P. Barsis and Mary Ellen Johnson.....	681
The electric field at the ground plane near a disk-loaded monopole, Jesper Hansen and Tove Larsen.....	205	Range-error compensation for a troposphere with exponentially varying refractivity, J. J. Freeman.....	695
No. 3—May–June		On the geometrical optics of curved surfaces with periodic impedance properties, Chester J. Marcinkowski and Leopold B. Felsen.....	699
A theory of radar reflections from a rough moon, Donald F. Winter.....	215	On the limitations of geometrical optics solutions for curved surfaces with variable impedance properties, Chester J. Marcinkowski and Leopold B. Felsen.....	707
A lunar theory reasserted, K. M. Siegel and T. B. A. Senior.....	227	Conversion of the amplitude-probability distribution function for atmospheric radio noise from one bandwidth to another, A. D. Spaulding, C. J. Roubique, and W. Q. Crichlow.....	713
Statistical distribution of the amplitude and phase of a multiply scattered field, Petr Beckmann.....	231	Some statistical properties of pulsed oblique HF ionospheric transmissions, Martin Balser and William B. Smith.....	721
		Induction in a small loop moving with a magnetostatic dipole toward a conducting half space, Martin B. Kraichman.....	731
		Propagation of terrestrial radio waves of long wavelength—theory of zonal harmonics with improved summation techniques, J. R. Johler and L. A. Berry.....	737
		Terminal-zone corrections for a dipole driven by a two-wire line, Keigo Iizuka and Ronald W. P. King.....	775
		Pattern synthesis with a flush-mounted leaky-wave antenna on a conducting circular cylinder, Akira Ishimaru and Frederick R. Beich.....	783

1963, Volume 67D, Journal of Research of the National
Bureau of Standards—Section D. *Radio Propagation*. Editor: David M. Gates

No. 1—January–February

"A lunar theory reasserted"—a rebuttal. J. V. Evans.....	Page 1
Point-to-point communication on the moon. L. E. Vogler.....	5
HF communication during ionospheric storms. Geoffrey E. Hill.....	23
Use of surface refractivity in the empirical prediction of total atmospheric refraction. W. R. Iliff and J. M. Holt.....	31
Effective sunspot numbers, January 1961 through July 1962. W. B. Chadwick.....	37
On the theory of radio wave propagation over inhomogeneous earth. K. Furutsu.....	39
Correction to "Fields of electric dipoles in sea water, the earth-atmosphere-ionosphere problem." Wallace L. Anderson.....	63
Composition of reflection and transmission formulae. John Heading.....	65
Titheridge coefficients for the polynomial method of deducing electron density profiles from ionograms. Audrey R. Long and J. O. Thomas.....	79
Input admittance of linear antennas driven from a coaxial line. Tai Tsun Wu.....	83

No. 2—March–April

The protection of frequencies for radio astronomy. R. L. Smith-Rose.....	99
Radar reflections from the moon at 425 Mc/s. George H. Millman and Fred L. Rose.....	107
Sunset and sunrise in the ionosphere: effects on the propagation of longwaves. Jean Rieker.....	119
Correction of atmospheric refraction errors in radio height finding. W. B. Sweezy and B. R. Bean.....	139
Empirical determination of total atmospheric refraction at centimeter wavelengths by radiometric means. Alan C. Anway.....	153
Propagation of radiofrequency electromagnetic fields in geological conductors. Volker Fritsch, Translated from German by Albrecht P. Barsis.....	161
WWV reception in the arctic during ionospheric disturbances. Geoffrey E. Hill and John R. Herman.....	179
Height-gain for VLF radio waves. James R. Wait and Kenneth P. Spies.....	183
Perturbation method in a problem of waveguide theory. David Fox and Wilhelm Magnus.....	189
Some wave functions and potential functions pertaining to spherically stratified media. C. T. Tai.....	199
Radiation from a plasma-clad axially-slotted cylinder. W. V. T. Rusch.....	203
Two- and three-loop superdirective receiving antennas. Elwin W. Seeley.....	215
Hallén's method in the problem of a cavity-backed rectangular slot antenna. Janis Galejs.....	237
Relative convergence of the solution of a doubly infinite set of equations. R. Mittra.....	245

No. 3—May–June

Effects of radio wave propagation through mid-latitude 6300 Å auroral arcs. J. R. Roach.....	263
Comparison of observed atmospheric radio refraction effects with values predicted through the use of surface weather observations. B. R. Bean and G. D. Thayer.....	273
Ionospheric scattering effects in long-distance propagation. H. A. Whale.....	287
Concerning solutions of the VLF mode problem for an anisotropic curved ionosphere. James R. Wait.....	297
On the statistical theory of electromagnetic waves in a fluctuating medium (I). K. Furutsu.....	303
Reception of skywave signals near a coastline. J. Bach Andersen.....	325
Analysis and synthesis of nonuniform transmission lines or stratified layers. G. Latmiral, G. Franceschetti, and R. Vinciguerra.....	331
Resonant characteristics of a corrugated sphere. James R. Wait and Caroleen M. Jackson.....	347
Impedances of long antennas in air and in dissipative media. D. W. Gooch, C. W. Harrison, Jr., R. W. P. King, and T. T. Wu.....	355
Reflection of VLF radio waves from an inhomogeneous ionosphere. Part I. Exponentially varying isotropic model. James R. Wait and Lillie C. Walters.....	361

No. 4—July–August

Influence of the lower ionosphere on propagation of VLF waves to great distances. James R. Wait.....	375
Comments on a paper "Auroral Sporadic-E Ionization" by Robert D. Hunsucker and Leif Owren. J. M. Bullen and C. A. M. King.....	383
Reply to J. M. Bullen and C. A. M. King's "Comments on a paper 'Auroral Sporadic-E Ionization' by Robert D. Hunsucker and Leif Owren." Robert D. Hunsucker and Leif Owren.....	385
Optimum reception pattern of the Beverage wave antenna at very low frequencies. Elwin W. Seeley.....	387
Effect of a dissipative medium of finite size on antenna measurement. K. Iizuka and R. W. P. King.....	397
Some implications of aircraft interference patterns in troposcatter reception. John A. Bradshaw.....	405
Asymptotic behavior of the current on an infinite cylindrical antenna. K. S. Kunz.....	417
A dipole approximation of the backscattering from a conductor in a semi-infinite dissipative medium. Martin B. Kraichman.....	433
Small electric and magnetic antennas with cores of a lossy dielectric. Janis Galejs.....	445

No. 5—September–October

Ionospheric VHF scattering near the magnetic equator during the International Geophysical Year. Robert Cohen and Kenneth L. Bowles.....	Page 459
Radio pulse propagation by a reflection process at the lower ionosphere. J. Ralph Johler.....	481
Field of a horizontal magnetic dipole in the presence of a magnetoplasma halfspace. C. Tyraas, A. Ishimaru, and H. M. Swarm.....	501
Reflection of VLF radio waves from an inhomogeneous ionosphere. Part II. Perturbed exponential model. James R. Wait and Lillie C. Walters.....	519
Collisional detachment and the formation of an ionospheric C region. E. T. Pierce.....	525
Magnetic torques and Coriolis effects on a magnetically suspended rotating sphere. James Clark Keith.....	533
Radiation field characteristics of lightning discharges in the band 1 ke/s to 100 ke/s. W. L. Taylor.....	539
Low-frequency radio propagation into a moderately rough sea. Donald F. Winter.....	551
VLF superdirective loop arrays. Elwin W. Seeley.....	563
Curves of ground proximity loss for dipole antennas (a digest). L. E. Vogler and J. L. Noble.....	567
Observations and results from the "hiss recorder," an instrument to continuously observe the VLF emissions. James M. Watts, Jean A. Koch, and Roger M. Gallet.....	569

No. 6—November–December

A radiometeorological study, part I. Existing radiometeorological parameters. J. A. Lane and B. R. Bean.....	589
A radiometeorological study, part II. An analysis of VHF field strength variations and refractive index profiles. B. R. Bean, V. R. Frank, and J. A. Lane.....	597
A radiometeorological study, part III. A new turbulence parameter. B. R. Bean, E. J. Dutton, J. A. Lane, and W. B. Sweezy.....	605
Reflection of radio waves from undulating tropospheric layers. A. T. Waterman, Jr., and J. W. Strubbehn.....	609
Oblique propagation of groundwaves across a coastline—Part I. James R. Wait.....	617
Oblique propagation of groundwaves across a coastline—Part II. James R. Wait and Caroleen M. Jackson.....	625
On the index of refraction of air, the absorption and dispersion of centimeter waves by gases. Georges Boudouris, Translated from French by G. Wm. Curtis.....	631
A numerical approach to the solution of radio diffraction problems. J. K. Hargreaves and S. Hargreaves.....	685
Inversion of radiowave absorption data to establish ionospheric properties. I. Non-deviative absorption. Albert D. Wheelon.....	699
Radiation in a lossless magneto-ionic medium at frequencies high relative to the electron gyrofrequency. John W. Marini.....	707
Radiation through cylindrical plasma sheaths. J. H. Harris.....	717
Chart for determining the effects of ionospheric tilts using an idealized model. T. A. Croft and R. B. Fenwick.....	735
Reflection of VLF radio waves from an inhomogeneous ionosphere. Part III. Exponential model with hyperbolic transition. James R. Wait and Lillie C. Walters.....	747
Families of distributions for hourly median power and instantaneous power of received radio signals. M. M. Siddiqui and George H. Weiss.....	753
Statistical methods in radar astronomy. Determination of surface roughness. H. S. Hayre.....	763
Electrical conductivity of the Great Lakes. Lorne H. Doherty.....	765

1964, Volume 68D, Journal of Research of the National
Bureau of Standards—Section D. *Radio Science*.
Editors: C. Gordon Little, James R. Wait, and
L. A. Manning

No. 1—January

Comparison of observed VLF attenuation rate and excitation factors with theory. A. D. Watt and R. D. Croghan.....	Page 1
Field intensity measurements at 10.2 ke/s over reciprocal paths. J. C. Hanselman, C. J. Casselman, M. L. Tibbals, and J. E. Bickel.....	11
The propagation of VLF waves over distances between 1000 and 3000 km. B. Burgess.....	15
Some experimental results concerning nonreciprocal east-west VLF wave propagation. B. Burgess.....	17
An experimental study of the phase stability of VLF signals. D. E. Hampton.....	19
Some particular observations on diurnal phase variations of VLF transmission received in Paris. B. Decaux and A. Gabry.....	21
Periodic fading of VLF signals received over long paths during sunrise and sunset. D. D. Crombie.....	27
Effects of wall perturbations in multimode waveguides. S. W. Maley and E. Bahar.....	35
VLF utilization at NASA satellite tracking stations. C. H. Looney, Jr.....	43
Long waves associated with disturbances produced in plasmas. H. Bremmer.....	47
Some remarks on the Watson transformation and mode theory. Leslie A. Berry.....	59
Concerning limitations and further corrections to geometric-optical theory for LF, VLF propagation between the ionosphere and the ground. J. Ralph Johler.....	67
Some remarks on mode and ray theories of VLF radio propagation. James R. Wait.....	79
Two-dimensional treatment of mode theory of the propagation of VLF radio waves. James R. Wait.....	81
Reflection of electromagnetic waves from a lossy magnetoplasma. James R. Wait and Lillie C. Walters.....	95
Propagation of ELF waves below an inhomogeneous anisotropic ionosphere. Janis Galejs and Ronald V. Row.....	103

	Page		Page
VLF propagation under the ionosphere in the lowest mode of horizontal polarization. Harold A. Wheeler.....	105	No. 6—June	
Propagation of VLF waves under disturbed conditions. B. Burgess.....	115	Electrical properties of sea ice at 0.1 to 30 Mc/s. F. L. Wentworth and M. Cohn.....	681
VLF disturbances caused by trapped beta-rays from the decay of neutrons produced in high-altitude nuclear explosions. A. J. Zmuda, B. W. Shaw, and C. R. Haave.....	117	ELF and VLF waves below an inhomogeneous anisotropic ionosphere. Janis Galejs.....	693
VLF anomalies observed at State College, Pa., during the U.S. 1962 high-altitude nuclear tests. C. F. Sechrist.....	125	The effects of a small local change in phase velocity on the propagation of a VLF radio signal. D. D. Crombie.....	709
		Auroral-zone absorption effects on an HF arctic propagation path.....	717
		Robert D. Hunsucker. Distribution of atmospheric radio noise. Petr Beckmann.....	723
		Amplitude-probability distribution of atmospheric radio noise. Petr Beckmann.....	737
		An approximate method for computing diffraction patterns caused by ionospheric irregularities. Ralph Gagnon.....	743
		Wave propagation in stratified random media. Yung Ming Chen.....	743
		Radar scattering from coated perfect conductors: application to the semi-infinite cone and use of exact eikonal. H. Uberall.....	749
No. 2—February		No. 7—July	
Generation of an electromagnetic pulse by an expanding plasma in a conducting half-space. A. P. Stogryn and R. N. Ghose.....	147	Leader and junction processes in the lightning discharge as a source of VLF at-mospheres. Helen R. Arnold and E. T. Pierce.....	771
Impedance of a monopole antenna with a radial-wave ground system on an imper-fectly conducting half-space, part II. S. W. Maley and R. J. King.....	157	The return stroke of the lightning flash as a source of VLF atmospheres.....	777
Capacitor type biconical antennas. Janis Galejs.....	165	A. S. Dennis and E. T. Pierce.....	795
Simulated angular response patterns for transhorizon propagation. J. W. Strohbehn and A. T. Waterman, Jr.....	173	VLF propagation in a compressible ionosphere. Richard B. Kieburz.....	807
Radio-star scintillations from ionospheric waves. James W. Warwick.....	179	A spectrographic interferometer. Robert H. Lee and James W. Warwick.....	813
Ionosonde studies of some chemical releases in the ionosphere. J. W. Wright.....	189	Effect of lossy earth on antenna gain, part II. Walter L. Curtis.....	819
Diurnal changes of transmission time in the arctic propagation of VLF waves. W. T. Blackburn.....	205	Calculation of groundwave attenuation in the far diffraction region. L. E. Vogler.....	827
Geometrical optics convergence coefficient for the whistler case. J. H. Cray.....	205	Some numerical results based on the theory of radio wave propagation over inhomogeneous earth. K. Furutsu, Robert E. Wilkerson, and Raymond F. Hartmann.....	847
Comments on a paper "Collisional Detachment on VLF signals propagated through C-region" by E. T. Pierce. Helen R. Arnold.....	215	A note on VHF reflection from a tropospheric layer. James R. Wait.....	849
The quasi-longitudinal approximation in the generalized theory of radio wave absorp-tion. Robert F. Benson.....	219	Some remarks on the use of statistics in radar astronomy. I. Kay.....	851
Diurnal phase variation of VLF waves at medium distances. Hans Volland.....	225	A meteorological parameter for radioclimatological purposes. Pierre Misme.....	
Application of diffractions by convex surfaces to irregular terrain situations. H. T. Dougherty and L. J. Maloney.....	239		
Effect of lossy earth on antenna gain. Richard J. Coe and Walter L. Curtis.....	251		
Propagation of radio waves with frequency 99.9 MHz as a function of the vertical structure of the atmosphere derived from daily radiosonde observations.....	257		
G. P. A. Braam.....		No. 8—August	
		Extension of cosmic noise absorption measurements to lower frequencies, using polarized antennas. C. G. Little, G. M. Lerfeld, and R. Parthasarathy.....	859
		Broadband radio-star scintillations, part I. Observations. D. G. Singleton.....	867
		F-region irregularities studied by scintillation of signals from satellites. K. C. Yeh and G. W. Swenson, Jr.....	881

		Modified gaussian distributions for slightly nonlinear variables.....	1049
		M. S. Longuet-Higgins.....	
No. 4—April		No. 10—October	
Some basic microwave phase shift equations. Robert W. Beatty.....	349	Theoretical heights and durations of echoes from large meteors. Laurence A. Manning.....	1067
A light-modulated scattering technique for diffraction field measurements. Ahyan M. Vural and David K. Cheng.....	355	Experimental determination of meteoric line densities and attachment rates. Laurence A. Manning.....	1079
Radiation from an aperture in a coated plane. Charles M. Knop and George I. Cohn.....	363	Broadband radio-star scintillations, II. Interpretation. D. G. Singleton.....	1095
Impedance of a cylindrical dipole having a sinusoidal current distribution in a homogeneous anisotropic ionosphere. W. S. Ament, J. C. Katzin, M. Katzin, and B. Y.-C. Kuo.....	379	A discussion of the theory of ionospheric cross modulation. Robert F. Benson.....	1109
Propagation of electromagnetic waves through a continuously varying stratified anisotropic medium. Gary H. Price.....	407	Electron collision frequency in the ionospheric D region. Robert F. Benson.....	1123
Lunar semi-diurnal tides in N^2 and their influence on transequatorial radio propaga-tion. J. A. Thomas.....	419	Theory of a slotted-sphere antenna immersed in a compressible plasma. Part I. James R. Wait.....	1127
Some statistical parameters related to the Nakagami-Rice probability distribution. William R. Burns.....	429	Theory of a slotted-sphere antenna immersed in a compressible plasma. Part II. James R. Wait.....	1137
The U.S. National Committee Report for Commission 6 of URSI. Subcommission 6.3, Electromagnetics.....	435	Electromagnetic scattering coefficients for concentric spheres and the problem of interference free enclosures. R. A. Eldred, H. A. Lasitter, and J. Roberts.....	1145
		Ionospheric sounding using coded pulse signals. D. C. Coll and J. R. Storey.....	1155
		Measurement of the complex time-frequency channel correlation function. Phillip A. Bello.....	1161
No. 5—May			
URSI National Committee Report, XIV General Assembly, Tokyo, September 1963: Commission 1. Radio measurement methods and standards.....	523		
Commission 2. Tropospheric radio propagation.....	547		
Commission 3. Ionospheric radio.....	569		
Commission 4. Magnetospheric radio.....	597		
Commission 5. Radio and radar astronomy.....	631		
Commission 7. Radio electronics.....	655		

No. 11—November	
Interaction of an antenna with a hot plasma and the theory of resonance probes. J. A. Fejer.....	1171
Observations of earth-ionosphere cavity resonances and their interpretation in terms of a two-layer ionosphere model. F. W. Chapman and D. Llanwyn Jones.....	1177
On the theory of reflection of electromagnetic waves from the interface between a compressible magnetoplasma and a dielectric. James R. Wait.....	1187
Propagation over plane earth through an exponential atmosphere. Irvin H. Gerks and Ronald M. Anderson.....	1193
Propagation in nonuniform waveguides with impedance walls. Robert L. Gullawa.....	1201
Some approximate formulas concerning the reflection of electromagnetic waves from a stratified semi-infinite medium. R. Burman.....	1215
A VLF timing experiment. A. H. Morgan and O. J. Baltzer.....	1219
Phase and time variations in VLF propagation over long distances. D. D. Crombie.....	1223
Geometrical optics convergence coefficient for whistler propagation. G. McK. Alcock.....	1225
Errors induced by the atmosphere in microwave range measurements. H. B. James and M. C. Thompson.....	1229
Some features of Es-ionization of the equatorial ionosphere. P. Bandyopadhyay and H. Montes.....	1237
A note on the insulated loop antenna immersed in a conducting medium. James R. Wait and Kenneth P. Spies.....	1249
Observation and analysis of transequatorial propagation. J. A. Thomas and B. A. McInnes.....	1251

No. 12—December

Experiment on the constancy of the velocity of electromagnetic radiation. Petr Beckmann and Peter Mandics.....	1265
Measurement of the phase velocity of VLF propagation in the earth-ionosphere waveguide. F. K. Steele and C. J. Chilton.....	1269
Wave hop theory of long distance propagation of low-frequency radio waves. Leslie A. Berry.....	1275
Wave propagation in a compressible ionosphere. Part I. S. R. Seshadri.....	1285
Wave propagation in a compressible ionosphere. Part II. S. R. Seshadri.....	1297
Spatial properties of the amplitude fading of continuous HF radio waves. John Ames.....	1309
Physical properties of the polar winter mesosphere obtained from low-frequency propagation and partial reflection studies. J. S. Belrose, L. R. Bode, and L. W. Hewitt.....	1319
Reply to the "Remarks by Donald H. Menzel With Reference to Bailey's Comments on Solar Electric Fields." V. A. Bailey.....	1325

1965, Volume 69D, Journal of Research of the National Bureau of Standards—Section D. *Radio Science*. Editors: James R. Wait and L. A. Manning

No. 1—January

Some problems of ionospheric nonlinearities. Donald H. Menzel.....	Page 1
Some nonlinear phenomena in the ionosphere. V. A. Bailey.....	9
An experimental study of gyro interaction in the ionosphere, at oblique incidence. F. H. Hibberd.....	25
On some nonlinear phenomena in the ionospheric plasma. P. Caldirola and O. De Barbieri.....	33
Ionospheric cross modulation: a microscopic theory. David Lazer and Donald H. Menzel.....	59
VLF noise bands observed by the Alouette I satellite. J. S. Belrose and R. E. Barrington.....	69
Excitation of optical radiation by high power density radio beams. Lawrence R. Megill.....	77
Alteration of the electron density of the lower ionosphere with ground-based transmitters. Pietro P. Lombardini.....	83
Collision effects in hydromagneto-ionic theory. Hari K. Sen and Arne A. Wyller.....	95
Electromagnetic wave reflection from an oscillating, collision-free magneto-ionic medium. O. E. H. Rydbeck.....	111
Nonlinear propagation of electromagnetic waves in magnetoplasmas. II. (An invited abstract) Mahendra S. Sodha and Carl J. Palumbo.....	139

No. 2—February

"Waves in Plasma" Papers

Electromagnetic wave penetration of reentry plasma sheaths. M. P. Bachynski.....	147
On the use of refractive index diagrams for source-excited anisotropic regions. Leopold B. Felsen.....	155
Surface waves along a perfectly conducting plane covered with semi-infinite magnetoplasma. S. Adachi and Y. Mushiaki.....	171
On the point of emergence of a microwave beam entering a linearly graded plasma. A. L. Cullen.....	177
Self and mutual admittances of waveguides radiating into plasma layers. Janis Galejs.....	179
Effect of electron collisions on the formulas of magneto-ionic theory. K. G. Budden.....	191

Momentum transfer collisions in oxygen for thermal electrons. Michael H. Mentzoni.....	Page 213
Experimental studies of perturbations in ionospheric plasma. L. H. Heisler.....	219
Electromagnetic scattering by gyrotropic cylinders with axial magnetic fields. W. C. Y. Lee, Leon Peters, Jr., and C. H. Walter.....	227
Radar cross sections of plasma bodies at the plasma frequency. Leon Peters, Jr.....	231
Electroacoustic waves excited by a space vehicle in ionized atmosphere and its effect on radar return. Kun-Mu Chen.....	235
Discussion on basic equations with source terms in compressive plasmas. Kun-Mu Chen.....	243
Scattering of electromagnetic and electroacoustic waves by a cylindrical object in a compressible plasma. James R. Wait.....	247

Regular Contributions

Multiphase periodic very-low-frequency emissions. Neil Brice.....	257
Radio studies of the high-latitude ionosphere during the solar eclipse of 20 July 1963. Robert D. Hunsucker.....	267
VLF and FL fields propagating near and into a rough sea. Robert M. Lerner and Joel Max.....	273
Insulated and loaded loop antenna immersed in a conducting medium. R. H. Williams.....	287
Capacitance of biconical antennas in magneto-ionic media: elliptic cone capacitance. V. P. Pyati and H. Weil.....	291
Calculations of the bistatic scattering cross section of a sphere with an impedance boundary condition. James R. Wait and Carol M. Jackson.....	299
Concept of differential reflectivity as applied to the reflection of beam-limited radiation by a convex body. A. Erteza, J. A. Doran, and D. H. Lenhart.....	317

No. 3—March

"Waves in Plasma" Papers

Propagation in nonuniform gyrotropic media. Stanley H. Gross and L. B. Felsen.....	333
Geometrical optics for gyrotropic bodies. W. C. Y. Lee, Leon Peters, Jr., and C. H. Walter.....	349
Attenuation of hydromagnetic waves in the ionosphere. Syun-Ichi Akasofu.....	361
Self distortion of radio signals in the D region. Lawrence R. Megill.....	367
Atmospheric gravity waves: a new toy for the wave theorist. C. O. Hines.....	375
Electromagnetic fluctuations in an equilibrium plasma. Ronald E. Burgess.....	381
Hydromagnetic wave in an inhomogeneous, cylindrical plasma. C. K. McLane and T. Tsukishima.....	389
Angular dependence of the refractive index in the ionosphere. Georges A. Deschamps.....	395
Electrodynamics of moving anisotropic media: the first-order theory. C. T. Tai.....	401

Regular Contributions

Study of the phenomenon of whistler echoes. T. Laaspere, W. C. Johnson, and J. F. Walkup.....	407
Multiple-frequency investigations of radio wave absorption during the dawn-breakup phase of auroras. R. Parthasarathy and F. T. Berkey.....	415
Sferic excitation of a two-layer conducting medium. Martin B. Kraichman.....	423
Currents, charges, and near fields of cylindrical antennas. Ronold W. P. King and Tai Tsun Wu.....	429
A note on the radiation conductance of an axial slot on a cylinder. Charles M. Knop and Calvin T. Swift.....	447
Analytical formulas for radio paths in spherically stratified ionospheres. E. Woyk (Chvojekova).....	453

No. 4—April

"Waves in Plasma" Papers

Dispersion of waves in a cold magneto-plasma from hydromagnetic to whistler frequencies. Henry G. Booker and Rolf B. Dye.....	463
Study on the guiding mechanism of whistler radio waves. Saburo Adachi.....	493
Electromagnetic waves along an infinitely long and thin conducting wire in a magneto-ionic medium. Yasuto Mushiaki.....	503
Use of the phase-integral method to determine the reflection properties of a stratified ionosphere. C. Altman.....	511
E-mode propagation in a plane-stratified plasma. Peter Hirsch and Jerry Shmoys.....	521
Radiation from an infinite axial slot on a circular cylinder clad with magnetoplasma. Philippe de Marchin and G. Tyras.....	529
Index of refraction surfaces for plasma waves. Tyan Yeh and Marshall H. Cohen.....	539
Impedance of a short dipole in a compressible plasma. K. G. Balmain.....	559
Waves circulating around a rigid cylindrical obstacle in a compressible plasma. James R. Wait.....	567
Wave propagation in a two component warm plasma. S. R. Seshadri.....	579
Harmonic currents excited by an electromagnetic wave in a plasma. Lewis Wetzel and Ting-Wei Tang.....	599
Excitation of acoustic waves in plasmas. William A. Saxton.....	609
Wave interaction in oxygen magneto plasmas. K. V. Narasinga Rao.....	617

Regular Contributions

Test of the constancy of the velocity of electromagnetic radiation in high vacuum. Petr Beckmann and Peter Mandics.....	623
Signal degeneration in laser beams propagated through a turbulent atmosphere. Petr Beckmann.....	629
High frequency backscatter from the earth measured at 1000 km altitude. R. C. Chia, A. K. Fung, and R. K. Moore.....	641
Observation of NPG VLF transmissions at Tracy, California during path equinox. G. B. Carpenter and A. L. Whitson.....	651
Small magnetic toroid antenna imbedded in a highly conducting half space. George R. Swain.....	659

No. 5—May

"Waves in Plasma" Papers

- On electromagnetic radiation from a magnetic dipole with arbitrary orientation embedded in a lossless magneto-ionic medium. H. Motz..... 671
- A systematic study of the radiation patterns of a dipole in magnetoplasma based on a classification of the associated dispersion surfaces. R. Mittra and G. L. Duff... 681
- Propagation of vertically polarized electromagnetic waves in a horizontally stratified magnetoplasma. R. Burman and R. N. Gould..... 693
- A note concerning the reflection of waves in inhomogeneous layers with asymmetric profiles. R. Burman..... 701
- On the terrestrial propagation of ELF and VLF waves in the presence of a radial magnetic field. Janis Galejs..... 705
- Electron density profiles in cylindrical plasmas from microwave refraction data. B. A. Anicin..... 721
- A study of the waves supported by a warm plasma slab. P. R. Caron..... 729
- Transmission and reflection of electromagnetic waves by a hot plasma. Edward C. Taylor..... 735
- Radiation from electrons in a magnetoplasma. Harold B. Liemohn..... 741
- Radiation from a uniformly moving charge in an anisotropic, two component plasma. S. R. Seshadri and H. S. Tuan..... 767

No. 6—June

"Waves in Plasma" Papers

- Preface to the fifth and final group of "Waves in Plasma" papers. James R. Wait..... i
- Cyclotron harmonic waves in warm plasmas. F. W. Crawford..... 789
- Propagation of waves across a magnetoplasma-vacuum boundary. Robert L. Gallawa..... 807
- Phase velocities and attenuation distances in the ionosphere. D. R. Croley, Jr., and B. S. Tanenbaum..... 819
- Ionospheric effects of electrostatic fields generated in the outer magnetosphere. George C. Reid..... 827
- An experimental study of plasma sheath effects on antennas. G. Tyra, P. C. Bargelotes, J. M. Hamm, and R. R. Schell..... 839
- An approach to improve re-entry communications by suitable orientations of antenna and static magnetic field. S. N. Samadur..... 851
- Concerning the mechanism of reflection of electromagnetic waves from an inhomogeneous lossy plasma. James R. Wait..... 865
- Selection of Papers Presented at 1964 World Conference on Radio Meteorology, Boulder, Colorado, September 14-18, 1964
- Angels in focus. David Atlas..... 871
- An investigation of clear air stratification with radar and elevated instruments. D. R. Hay and K. Naito..... 877
- On inferring the refractive-index structure of the troposphere from electromagnetic scattering experiments. Paul L. Smith, Jr..... 881
- The biexponential nature of tropospheric gaseous absorption of radio waves. E. J. Dutton and B. R. Bean..... 885
- Complete scattering parameters of polydispersed hydrometeors in the $\lambda 0.1$ to $\lambda 10$ cm range. D. Deirmendjian..... 893

No. 7—July

- International comparison of atomic frequency standards via VLF radio signals. A. H. Morgan, E. L. Crow, and B. E. Blair..... 905
- Control of WWV and WWVH standard frequency broadcasts by VLF and LF signals. B. E. Blair and A. H. Morgan..... 915
- Measurements of the total electron content and the equivalent slab thickness of the midlatitude ionosphere. R. V. Bhonsle, Aldo V. da Rosa, and O. K. Garriott..... 929
- D-region absorption at 10 and 15 Mc/s during the total solar eclipse of 20 July 1963. G. M. Lerfeld, J. K. Hargreaves, and J. M. Watts..... 939
- Effect of the eclipse of 20 July 1963 on VLF signals propagating over short paths. J. H. Cray and D. E. Schneible..... 947
- A comparison of radar auroral reflection data with acoustic wave theory. Ray L. Leadbrand..... 959
- Electromagnetic properties of a plasma covered antenna. Daniel J. Jacavano..... 965
- Influence of an inhomogeneous ground on the propagation of VLF radio waves in the earth-ionosphere waveguide. James R. Wait..... 969
- Aspects of the terrestrial ELF noise spectrum when near the source or its antipode. L. G. Abraham, Jr..... 977
- Analysis of linear arrays focused in the Fresnel region. Pietro P. Lombardini, Richard Doviak, and Julius Goldhirsh..... 989
- Theory of coil antennas. Trilochan Padhi..... 997
- Small prolate spheroidal antenna in a dissipative medium. R. H. Williams, R. D. Kelly, and W. T. Cowan..... 1003
- Calculated curves for groundwave propagation over inhomogeneous earth with pronounced topographical features. K. Furutsu..... 1011

No. 8—August

"Ultra Low Frequency Electromagnetic Fields" Papers

- Preface to "Ultra Low Frequency Electromagnetic Fields" Papers..... i
- Wallace H. Campbell and Sadami Matsushita..... 1033
- Solar wind and its interaction with the magnetosphere. Charles P. Sonett..... 1043
- Schumann resonances. Janis Galejs.....

Page

- Earth-ionosphere cavity resonances and the propagation of ELF radio waves. James R. Wait..... 1057
- Resonances of the earth-ionosphere cavity observed at Cambridge, England. M. J. Rycroft..... 1071
- Experimental results on the dynamics of the F region. W. Becker, R. Rüster, and J. Klostermeyer..... 1083
- Regular oscillations near 1 c/s observed at middle and low latitudes. Lee Tepley..... 1089
- Preliminary results of a micropulsation experiment at conjugate points. Roger E. Gendrin and Valeria A. Troitskaya..... 1107
- Some characteristics of geomagnetic pulsations at frequencies near 1 c/s. Wallace H. Campbell and Ernest C. Stillner..... 1117
- Propagation of hydromagnetic waves in the magnetosphere. Masahisa Sugiura..... 1133
- Ionospheric perturbation (the roles played by the ionosphere in geomagnetic pulsations). S. Matsushita..... 1149
- Effects of induced earth currents on low-frequency electromagnetic oscillations. A. T. Price..... 1161
- Equatorial effects. Rosemary Hutton..... 1169
- Interpretation of early magnetic transients caused by high-altitude nuclear detonations. S. L. Kahalas and P. Newman..... 1179
- Abstracts of ULF Conference papers not published in this issue..... 1185

Regular Contributions

- A note on the application of pulse compression techniques to ionospheric sounding. D. C. Coll and J. R. Storey..... 1191
- Comments on a paper "Measurement of the phase velocity of VLF propagation in the earth ionosphere waveguide" by F. K. Steele and C. J. Chilton. Howard F. Bates... 1195
- Reply to H. F. Bates' Comments. F. K. Steele and C. J. Chilton..... 1196

No. 9—September

- Ground-based passive probing using the microwave spectrum of oxygen. E. R. Westwater..... 1201
- Response of NBS microwave refractometer cavities to atmospheric variations. R. O. Gilmer, R. E. McGavin, and B. R. Bean..... 1213
- Effects of rocket outgassing on RF experiments. W. Pfister and J. C. Ulwick..... 1219
- Further analysis of propagation of plasma waves in a "spoke-wheel" magnetic field. Richard R. Gold..... 1227
- Measurement of group velocity of 17.8-kc/s VLF radio waves. W. D. Westfall..... 1235
- On the radio noise level at low and very low frequencies in polar regions. T. Stockfleth Jorgensen..... 1239
- Experimental study on the circular loop antenna immersed shallowly in a conducting medium. Keigo Iizuka..... 1243
- Directivity of uniformly space optimum endfire arrays with equal sidelobes. M. T. Ma..... 1249
- Extension of Pock theory for currents in the penumbra region. V. H. Weston..... 1257
- Isometric-circle interpretation of bilinear transformation and its application to VSWR minimization. James G. Rudolph and David K. Cheng..... 1271
- Magneto-ionic propagation in inhomogeneous media. Part I. Transverse propagation. B. K. Banerjee..... 1285
- Magneto-ionic propagation in inhomogeneous media. Part II. Oblique propagation. B. K. Banerjee..... 1297
- Editorial comment on the scientific papers of Lord Rayleigh (John William Strutt). James R. Wait..... 1307

No. 10—October

- Irreversible power and radiation resistance of antennas in anisotropic ionized gases. K. S. H. Lee and C. H. Papas..... 1313
- Scattering resonances of a cylindrical plasma. William M. Leavens..... 1321
- Radiation patterns from plasma enclosed cylindrical hypersonic vehicles. J. H. Harris, A. T. Villeneuve, and L. A. Broca..... 1335
- The Schumann resonances. R. K. Cole, Jr..... 1345
- Atmospheric radio noise bursts in the LF band at Bangalore. S. V. C. Aiya and K. N. Lakshminarayan..... 1351
- Influence of finite ground conductivity on the propagation of VLF radio waves. James R. Wait and Kenneth P. Spies..... 1359
- Model experiments on propagation of groundwaves across an abrupt boundary at perpendicular incidence. R. J. King and S. W. Maley..... 1375

No. 11—November

- Propagation of pulses in dispersive media. James R. Wait..... 1387
- An anisotropic electron velocity distribution for the cyclotron absorption of whistlers and VLF emissions. H. Guthart..... 1403
- Noise whistler dispersion as a measure of magnetosphere electron temperature. H. Guthart..... 1417
- Interference rejection capability of a switched radiometer. Roger E. Clapp..... 1425
- Atmospheric breakdown limitations to optical maser propagation. Richard G. Tomlinson..... 1431
- Phase steps and amplitude fading of VLF signals at dawn and dusk. D. Walker..... 1435
- Propagation in a model terrestrial waveguide of nonuniform height: theory and experiment. E. Bahar and James R. Wait..... 1445
- Comments on H. Volland's "Remarks on Austin's Formula." James R. Wait..... 1465
- The path integrals of LF/VLF wave hop theory. Leslie A. Berry and Mary E. Chrisman..... 1469
- Reactive loading of arbitrarily illuminated cylinders to minimize microwave backscatter. Kun-Mu Chen..... 1481
- On the statistical theory of electromagnetic waves in a fluctuating medium (II). Mathematical basis of the analogies to quantum field theory (a digest). K. Furutsu..... 1503

No. 12—December

Symposium on Planetary Atmospheres and Surfaces, May 1965:	
I Session: Jupiter, as observed at long radio waves.....	1513
II Session: Jupiter, as observed at short radio waves.....	1543
III Session: Passive radio observations of Venus, Saturn, Mercury, Mars, and Uranus.....	1565
IV Session: Passive radio observations of the Moon.....	1585
V Session: Radar observations of the planets.....	1617
VI Session: Radar observations of the Moon.....	1637
Some highlights of the URSI symposium on electromagnetic wave theory held in Delft, The Netherlands, September 6-11, 1965. James R. Wait.....	1691

1966, Volume 1 (New Series), *Radio Science*. Editors:
James R. Wait and L. A. Manning

No. 1—January

	Page
Impedance of a radio-frequency plasma probe with an absorptive surface. K. G. Balmain.....	1
Current distribution and impedance of a cylindrical antenna in an isotropic compressible plasma. K. R. Cook and B. C. Edgar.....	13
Theory of a slotted-sphere antenna immersed in a compressible plasma. Part III. James R. Wait and Kenneth P. Spies.....	21
Change in polarization of reflection from a tilted plane. K. M. Mitzner.....	27
Slots in dielectrically loaded waveguide. R. W. Larson and V. M. Powers.....	31
Linearly polarized characteristic waves in a magnetoplasma. Joseph T. Verdeyen.....	37
Further observations of sunrise and sunset fading of very-low-frequency signals. D. D. Crombie.....	47
VLF radiation in air from an electric line current source located in an ionospheric half-space. H. D. Wade and R. H. Williams.....	53
Mountain obstacle diffraction measurements at 751 Mc/s and 9.2 Gc/s. Albrecht P. Baris and L. G. Hause.....	61
A statistical theory of ridge diffraction. K. Furutsu.....	79
Characteristics of ionospheric E_s propagation and calculation of E_s signal strength. K. Miya and T. Sasaki.....	99
The maximum resolution of a radio telescope imposed by coronal scattering. V. C. Erickson.....	109
Model experiments on propagation of ground waves across an abrupt boundary at oblique incidence. R. J. King and S. W. Maley.....	111
The trifurcated waveguide. J. R. Pace and R. Mittra.....	117
Reply to a comment of J. R. Wait on Volland's "Remarks on Austin's Formula." Hans Volland.....	123

No. 2—February

Proceedings of the Sporadic E Seminar

Proceedings of the seminar on the cause and structure of temperate latitude sporadic E. Ernest K. Smith and Sadami Matsushita.....	i
Preface to "Proceedings of the Sporadic E Seminar" papers. S. A. Bowhill.....	i
Some introductory and background comments on our state of knowledge of sporadic E. E. K. Smith.....	129
The structure of the sporadic E layer detected from VHF ionospheric propagation. Kazuhiko Tao.....	132
Experimental study of the structure of sporadic E (Summary). A. Spizzichino and A. Giraud.....	145
Characteristics of ionospheric sporadic E signal. K. Miya.....	145
Space and time correlations of ionospheric winds. N. W. Rosenberg and C. G. Justus.....	149
Observed characteristics of ionospheric winds. J. F. Bedinger and H. B. Knaflich.....	156
Prevailing and tidal wind shears in the E region. C. O. Hines.....	169
Some rocket results on sporadic E. M. Aubry, M. Blanc, R. Clauvel, C. Taieb, P. J. Bowen, K. Norman, A. P. Willmore, J. Sayers, J. H. Wager.....	170
Rocket observations of sporadic E and related features of the E region. L. G. Smith.....	178
A rocket experiment on the structure of sporadic E. S. A. Bowhill.....	187
The wind-shear theory of temperate zone sporadic E. W. I. Axford and D. M. Cunnold.....	191
Mixtures of ions in the wind-shear theory of sporadic E. J. D. Whitehead.....	198
Sporadic E and ionospheric currents. S. Matsushita.....	204
Formation of sporadic E layers at temperate latitudes due to vertical gradients of charge density. Takao Tsuda, Tetsuya Sato, and Ken-ichi Maeda.....	212
Theoretical basis of the formation of sporadic E due to wind motion in the ionosphere. S. Kato.....	226
Some problems associated with midlatitude sporadic E. Keith D. Cole and Richard B. Norton.....	235
Summary and conclusions from the Estes Park sporadic E seminar:	
1. Radio measurements. Kenneth L. Bowles.....	242
2. Rocket measurements. L. G. Smith.....	244
3. Ionospheric wind patterns. N. W. Rosenberg.....	246
4. Theories. S. A. Bowhill.....	248
5. Future plans. C. O. Hines.....	250
A note on the influx of extraterrestrial dust as an energy source in the E region. Giorgio Fiocco.....	252

No. 3—March

	Page
Doppler frequency changes in radio waves propagating through a moving ionosphere. J. A. Jacobs and T. Watanabe.....	257
Justification of the use of multiple isothermal layers as an approximation to the real atmosphere for acoustic-gravity wave propagation. Allan D. Pierce.....	265
Effects of ions on whistler-mode ray tracing. Iwane Kimura.....	269
Comparison of time-delay spread and spatial coherence for ionospheric propagation. Karl D. Felperin.....	285
On the point of emergence of a conical microwave beam entering a particular nonuniform plasma column. A. L. Cullen.....	295
On the effect of heavy ions on LF propagation, with special reference to the nuclear environment (Digest). J. Ralph Johler and Leslie A. Berry.....	303
Effect of ionospheric reflections on the nature of the waveforms of radio atmospherics. H. Bhattacharya and Manoranjan Rao.....	309
Radiation in a moving anisotropic medium. S. W. Lee and Y. T. Lo.....	313
Wave propagation in drifting isotropic warm plasma. H. Unz.....	325
Boundary scattering effects in underwater sound propagation. H. W. Marsh and R. H. Mellen.....	339
Electromagnetic scattering by loaded wire loops. Roger F. Harrington and Joseph L. Ryerson.....	347
The electric field very near a driven cylindrical antenna. Ronold W. P. King and Tai Tsun Wu.....	353
Radiation impedance of a dipole in an infinite planar phased array. L. Stark.....	361
Vertical magnetic dipole buried inside a homogeneous earth. A. K. Sinha and P. K. Bhattacharya.....	379
Analysis of a double discontinuity in a coaxial line. F. A. Hinchey and Sheila Prasad.....	397
A summary of papers presented at the Conference on Atmospheric Limitations to Optical Propagation. Jurgen R. Meyer-Arendt.....	405
A note on the evaluation of some constants of antenna theory. R. A. Hurd.....	411

No. 4—April

Time history of the magnetospheric cavity. F. J. F. Osborne, M. P. Bachynski, and J. V. Gore.....	419
Magneto-ionic coupling in an inhomogeneous anisotropic medium. Yuji Inoue and Samuel Horowitz.....	427
Phase height and the ionospheric valley ambiguity. Adolf K. Paul.....	441
Excitation of the lower hybrid resonance by an antenna in the ionosphere. J. A. Fejer.....	447
Slot admittance for compressible plasma layers. Janis Galejs.....	457
Theories of prolate spheroidal antennas. James R. Wait.....	475
On the determination of VLF propagation parameters by field strength measurements over medium distances. J. Frisius.....	513
Deterioration of the coherence properties of a laser beam by atmospheric turbulence and molecular scattering. A. Consortini, L. Ronchi, A. M. Scheggi, and G. Toraldo di Francia.....	523
Numerical simulation of ionospheric wave interaction experiments (Digest of NBS Technical Note 325). T. M. Georges.....	531

No. 5—May

Quantitative observations of dot angel echoes at two frequencies. Andrew P. Deam and Alfred H. LaGrone.....	537
On frequency variations of ionospherically propagated HF radio signals. Kenneth Davies and Donald M. Baker.....	545
The effect of a specular component on the correlation between the signals received on spaced antennas. H. A. Whale and C. W. Gardiner.....	557
Impedance of a small VLF dipole in the ionosphere. D. A. deWolf.....	571
Radiation from a magnetic line source located on a conducting plane covered by a warm plasma layer. Norman C. Wenger.....	577
Infinite helical sheath antenna. Chin-Lin Chen.....	589
Synthesis of nonuniformly spaced antenna arrays yielding approximately equal sidelobes. M. T. Ma and Lillie C. Walters.....	601
Contour plots for the diffraction of a pulse by a wedge. John I. Makhoul.....	609

No. 6—June

Preface to "Mode Theory of Wave Propagation" papers. James R. Wait.....	i
Alternative representations of source-excited vector and scalar fields. Leopold B. Felsen and N. Marcuvitz.....	619
Transverse propagation of waveguide modes in a cylindrically stratified magnetoplasma. James R. Wait.....	641
Cavity resonator modes in a cylindrically stratified magnetoplasma. David B. Large and James R. Wait.....	655
Wave propagation in plasma waveguides. J. Webber and G. D. Sims.....	659
Theory of duct propagation of whistler radio waves. Saburo Adachi.....	671
Mode propagation in continuously curved waveguides. J. Alan Cochran and Robert G. Pecina.....	679
On wave propagation in large waveguides containing random media. Yung Ming Chen.....	697
A normal mode theory of an underwater acoustic duct by means of Green's function. Roy L. Deavenport.....	709

No. 7—July

Transhorizon propagation measurements from a simultaneous frequency and angle scan experiment. J. W. Strohbehn and A. T. Waterman, Jr.....	729
The angular spread of radio waves in long-distance ionospheric propagation. H. A. Whale.....	743

A comparison of long-distance HF radio-signal reception at high and low receiving sites. M. R. Epstein, V. R. Frank, G. H. Barry, and O. G. Villard, Jr.	751
Baseband multipath fading simulator. W. F. Walker.	763
The effect of collisions upon the virtual heights of low-frequency radio waves reflected from the ionosphere. A. J. Ferraro and C. P. Tou.	769
Groundwave propagation across semi-infinite strips and islands on a flat earth. R. J. King and W. I. Tsukamoto.	775
Quasi-oscillations of cold, sharply bounded plasmas. William M. Leavens and Ileana B. Leavens.	789
Potentials for cylindrical warm plasmas. Maurice I. Sancer.	799
Wave propagation in plasmas with very strong magnetic field. S. W. Lee, C. Liang, and Y. T. Lo.	815
On axis far-field backscattering from flared axially symmetric bodies. Herschel Weil and Joseph L. Raymond.	825
Determination of the admittance and effective length of cylindrical antennas. R. W. P. King, E. A. Aronson, and C. W. Harrison, Jr.	835
Precautionary note on stratification. Roy N. Adams and Eugene D. Denman.	851

No. 8—August

Additional papers on "Mode Theory of Wave Propagation"

Excitation of the whistler mode in the ionosphere by leakage from VLF guided-wave modes. C. Capetanopoulos and R. B. Kiebert.	859
Geometric optics investigation of HF and VHF guided propagation in the ionospheric whispering gallery. M. D. Grossi and B. M. Langworthy.	877
Investigation of the mode conversion at a modeled sunrise change in ionosphere effective height. John J. Hicks.	887
Comparison of experiments on duct propagation above the sea with the mode theory of Booker and Walkinshaw. Helmut Jenke and Karl Brooks.	891
Diffraction of radio waves in a stratified troposphere. Irvin H. Gerks and Ronald M. Anderson.	897
Electromagnetic propagation in an idealized earth crust waveguide. James R. Wait.	913
Propagation of VLF radio waves in a model earth-ionosphere waveguide of arbitrary height and finite surface impedance boundary: theory and experiment. E. Bahar.	925

Regular Contributions

Survey of VLF electric fields in the magnetosphere with the polar orbiting spacecraft, 1964-45A. F. L. Scarf, G. M. Crook, and R. W. Fredricks.	939
Numerical solution of full-wave equation with mode coupling. Yuji Inoue and Samuel Horowitz.	957
Resistance of a short antenna in a warm plasma. H. H. Kuehl.	971
Excitation of surface currents on a plasma-immersed cylinder by electromagnetic and electrokinetic waves. I. The vacuum sheath. E. K. Miller and A. Olte.	977
A bistatic radar method for the determination of ϵ and μ for a smooth spherical target. A. Erteza and J. A. Doran.	995
Experimental results of VLF dipole tests on the Greenland ice cap. T. L. Johnson and G. M. R. Winkler.	1003

No. 9—September

The "infinity catastrophe" associated with radiation in magnetoionic media. Harold Staras.	1013
A further explanation of the new theory of antenna radiation with particular reference to uniaxial media. K. S. H. Lee and C. H. Papas.	1020
Irreversible power and radiation resistance of antennas in magnetoionic media. D. Walsh and H. Weil.	1025
On Walsh and Weil's defense of the conventional method. K. S. H. Lee and C. H. Papas.	1027
Radiation and propagation of electromagnetic waves from moving sources. Robert M. Lewis and Walter Pressman.	1029
On the admittance of the infinite cylindrical antenna. R. L. Fante.	1041
A modified Fock function for the distribution of currents in the penumbra region with discontinuity in curvature. S. Hong and V. H. Weston.	1045
A note on the Lorentz transformations for a moving anisotropic plasma. B. R. Chuwa and H. Unz.	1055
Impedance of an insulated linear antenna between layers of compressible plasma. Janis Galejs.	1057
Boundary conditions for a unique solution to the linearized warm-plasma equations. Maurice I. Sancer.	1067
A possible mechanism for excessive mode conversion in the earth-ionosphere waveguide. James R. Wait.	1073
A numerical method for interpreting D-region radio pulse interaction measurements. T. M. Georges.	1077
Nonlinear interaction of a number of electromagnetic waves in a magneto-plasma. Predhiman Krishan Kaw.	1089
Group propagation in the whistler-hydrumagnetic extension of magnetoionic theory. Gideon Kantor and Frank Pivarunas.	1093
Role of a complex ionic composition in the wind-shear theory of sporadic-E layers. Laurent Cuchet.	1101
Sporadic E at night. J. D. Whitehead.	1111
A world atlas of atmospheric radio refractivity (Digest of ESSA Monograph No. 1). B. R. Bean, B. A. Cahoon, C. A. Samson, and G. D. Thayer.	1113
Some highlights of a symposium on subsurface propagation of electromagnetic waves, Paris, April 25-28, 1966. James R. Wait.	1115

No. 10—October

Symposium on Radio Astronomical and Satellite Studies of the Atmosphere, October 1965:	
Preface. Jules Aarons (Guest Editor).	i
I Total Electron Content.	1125
II Scintillation.	1163
III Absorption.	1188
IV Tropospheric Absorption.	1200
V High-Frequency Propagation.	1214

No. 11—November

Rotating interferometer and its use in measuring the spread and coherence ratio of a scattered radio wave. H. A. Whale and R. W. Bannister.	1237
Angle-of-arrival measurements performed over a 296-km troposcatter path. R. B. Kiebert and I. A. Fanera.	1245
Microwave scattering from an underdense turbulent plasma. H. Guthart, D. E. Weissman, and T. Morita.	1253
Further experimental study of plasma sheath effects on antennas. John M. Hamm and George Tyras.	1263
Observations on the propagation constant of the earth-ionosphere waveguide in the frequency band 8 c/s to 16 kc/s. F. W. Chapman, D. Llanwyn Jones, J. D. W. Todd, and R. A. Challinor.	1273
Gradient instabilities as possible causes of irregularities in the ionosphere. C. H. Liu and K. C. Yeh.	1283
Kinetic theory and collisional detachment. Peter M. Banks.	1293
Quasi-static theory of a cylindrical impedance probe for magneto-plasma. James R. Wait.	1297
Transmission loss for ionospheric propagation above the standard MUF. J. L. Wheeler.	1303
Current in a scattering antenna embedded in a dissipative half-space. H. S. Tuan and R. W. P. King.	1309
Quasi-static fields of dipole antennas at the earth's surface. Peter R. Bannister.	1321
U.S.A. National Committee Report, Fifteenth URSI General Assembly, Munich, Germany, September 1966.	1331

(Preface and Table of Contents)

Commission 1. Radio measurement methods and standards.	1333
Commission 2. Radio propagation in nonionized media.	1341
Commission 3. Ionospheric radio.	1351
Commission 4. Magnetospheric radio.	1363

No. 12—December

U.S.A. National Committee Report, Fifteenth URSI General Assembly, Munich, Germany, September 1966:	
Commission 6. Progress in radio waves and transmission of information.	1371
Commission 7. Progress in radio electronics.	1379
Effective recombination coefficient in the D region. R. Parthasarathy and D. B. Rai.	1397
Effect of meteoric dust on the effective recombination coefficient in the lower ionosphere. R. Parthasarathy and D. B. Rai.	1401
New measurements of phase velocity at VLF. G. Kamas, A. H. Morgan, and J. L. Jespersen.	1409
Propagation of VLF waves past a coastline. D. R. Dobrott.	1411
Excitation of surface currents on a plasma-immersed cylinder by electromagnetic and electrokinetic waves. Part II. The inhomogeneous sheath. E. K. Miller and A. Olte.	1425
Application of conformal mapping to earth-flattening procedures in radio propagation problems. Juergen H. Richter.	1435
Approximations to the double knife-edge attenuation coefficient. Robert E. Wilkerson.	1441
Summary of the 1965 URSI symposium at Delft, Netherlands: Sessions on nonlinear and transient phenomena. E. S. Cassedy.	1445

1967, Volume 2 (New Series), *Radio Science*. Editors: D. D. Crombie and L. A. Manning

No. 1—January

Scattering of waves by a medium with strong fluctuations of refractive index. Piero Bassanini, Carlo Cercignani, Franco Sergiagiotto, and Gino Tironi.	1
Finite scattering matrix for an infinite antenna array. E. C. DuFort.	19
Radiation and scattering problems in compressible plasmas. Part I. Solutions by ray optics. Leopold B. Felsen and F. M. Labianca.	29
Radiation and scattering problems in compressible plasmas. Part II. Solutions of boundary-value problems. F. M. Labianca and Leopold B. Felsen.	53
Computations of the resistance of a short antenna in a warm plasma. H. H. Kuehl.	73

	Page
Oblique sweep-frequency experiments over a 2000-km north-south sub-auroral path. Hans G. Müller.....	77
Effect of thin plasmas on an aperture antenna in an infinite conducting plane. R. L. Fante.....	87
Field-strength measurements in a multipath field using linear and circular probing. R. Mitra and C. O. Stearns.....	101
Illumination of an inhomogeneous spherical earth by an LF plane electromagnetic wave. James R. Wait.....	111
Diurnal changes of phase and group velocity of VLF radio waves. W. D. Westfall.....	119

No. 2—February

Calculation of the virtual height and absorption of radio waves in the ionosphere. J. E. Titheridge.....	133
VLF transmission loss calculated from spectral analyses of atmospherics. W. L. Taylor.....	139
The Illinois 400-foot radio telescope: performance and electronic equipment. K. S. Yang and G. W. Swenson, Jr.....	147
Determination of antenna height for protection against microwave diffraction fading. Harold T. Dougherty and Robert E. Wilkerson.....	161
Theory of the balanced helical wire antenna. Chin-Lin Chen.....	167
Cylindrical antenna with tapered resistive loading. Liang-Chi Shen and Tai Tsun Wu.....	191
Admittance of a plasma-covered cylindrical antenna. G. Meltz, P. J. Freyheit, and C. D. Lustig.....	203
Thermal radiation fields and antenna parameters in magnetoplasma. Herschel Weil and D. Walsh.....	225
Corona currents after the return stroke and the emission of ELF waves in a lightning flash to earth. Manoranjan Rao.....	241
Present views on electrodynamics of moving media. C. T. Tai.....	245
A rapid and accurate ray tracing algorithm for a horizontally stratified atmosphere. C. D. Thayer.....	249
Further note on the quasi-static theory of a cylindrical impedance probe for magnetoplasma. James R. Wait.....	253

No. 3—March

Propagation of electromagnetic waves near a coastline on a flat earth. R. F. Millar.....	261
Generalized scattering matrix equations for waveguide structures of varying surface impedance boundaries. E. Bahar.....	287
Modal solution of a point source in a strongly focusing medium. E. T. Kornhauser and A. D. Yaghjian.....	299
Waves in a partially ionized paramagnetic gas. R. R. Hodges, Jr.....	311
Atmospheric attenuation at millimeter wavelengths. Karl N. Wulfsberg.....	319
Infinite cylindrical dielectric-coated antenna. Chung-Yu Ting.....	325
Transmission and reception properties of an equatorial slot antenna on a reentry sphere. Charles W. Harrison, Jr. and Clayborne D. Taylor.....	337
On the exact theory of a prolate spheroidal receiving and scattering antenna. Clayborne D. Taylor.....	351
Proof that a phased-array antenna can be impedance matched for all scan angles. Peter W. Hannan.....	361

No. 4—April

Phase measurements of VLF transmission over an 11,000-km transequatorial path. R. R. Scarabucci and F. de Mendonça.....	373
Diurnal phase change of VLF signals propagated over long paths. G. Ries.....	379
A numerical investigation of classical approximations used in VLF propagation. Richard A. Pappert, Earl E. Gossard, and Ilan J. Rothmüller.....	387
On the coupling of modal waves in a plasma-filled parallel-plate waveguide. S. W. Lee, C. Liang, and Y. T. Lo.....	401
Transient E-mode propagation in a plane-stratified plasma. Peter Hirsch.....	407
Electromagnetic scattering from rough, finitely conducting surfaces. Alex Stogryn.....	415
Wave propagation in a one-dimensional random medium. Piero Bassanini.....	429
On Rytov's method. Leonard S. Taylor.....	437

No. 5—May

A study of the depolarization of lunar radar echoes. Tor Hagfors.....	445
A new method of obtaining an ionospheric index of solar activity from the F2 layer critical frequencies. Chun-ming Huang.....	467
Traveling waves in relation to the surface fields on a semi-infinite cone. T. B. A. Senior and P. H. Wilcox.....	479
RF admittance measurements of a slotted-sphere antenna immersed in a plasma. J. A. Waletzko and G. Bekefi.....	489
On the problem of the infinite antenna in an anisotropic plasma. K. R. Cook and C. L. Johnson.....	495
Some spectral characteristics of the radio refractivity in the surface layer of the atmosphere. B. R. Bean, C. B. Emmanuel, and R. W. Krinks.....	503
A note on the potential of a vertical electric dipole over the interface between two lossy media. P. C. Caccavas and G. Tyraas.....	511
Zenneck memorial lecture. Georg Goubau.....	513

No. 6—June

Preface to "Propagation of Long Radio Waves" papers. D. D. Crombie.....	i
Anomalous sunrise effects observed on a long transequatorial VLF propagation path. K. J. W. Lynn.....	521
Results concerning the sunrise effect of VLF signals propagated over long paths. G. Ries.....	531
An investigation of the modal interference of VLF radio waves. F. J. Rhoads and W. E. Garner.....	539
Frequency dependence of VLF fading at sunrise. F. K. Steele and D. D. Crombie.....	547
Theoretical investigation of the diurnal phase and amplitude variations of VLF signals. Donald E. Rugg.....	551
Propagation of VLF waves below an anisotropic stratified ionosphere with a transverse static magnetic field. Janis Galejs.....	557
VLF attenuation rates deduced from aircraft observations near the antipode of NPM. John E. Bickel.....	575
Airborne field strength measurements in the region of the NPM antipode. J. E. Rogerson.....	581
Frequency shifts on whistler mode signals from a stabilized VLF transmitter. F. A. McNeill.....	589
Transmission of VLF waves through the ionosphere. Bernard Wieder.....	595
Propagation of electromagnetic waves into anisotropic media from an external point-dipole source. Gary H. Price.....	607
Solar flare effects and VLF radio wave observations of the lower ionosphere. B. Burgess and T. B. Jones.....	619
Five years of VLF worldwide comparison of atomic frequency standards. B. E. Blair, E. L. Crow, and A. H. Morgan.....	627
Atmospheric noise from 20 Hz to 30 kHz. Eugene L. Maxwell.....	637
Oblique incidence ionospheric reflections of 100 kHz pulses. Robert H. Doherty.....	645
A note on the reflection coefficient of a sharply bounded ionosphere for VLF signals at the magnetic equator. J. M. de Lisle.....	653

No. 7—July

Influence of high-latitude disturbances on VLF propagation. A. Egeland and E. Naustvik.....	659
Measured amplitude variations of the 19.8 kHz field of NPM near its antipode. F. P. Snyder and J. E. Bickel.....	669
General mode structure and resonant frequencies for ferrite-loaded circularly cylindrical cavity resonators. Donald M. Bolle.....	681
Groundwave attenuation function for propagation over a highly inductive earth. R. J. King and Gerard A. Schlack.....	687
Resonances of the thin-shell model of the earth-ionosphere cavity with a dipolar magnetic field. David B. Large and James R. Wait.....	695
Utilization of the refractive index surfaces to evaluate Cerenkov radiation in an infinite magnetoplasma. R. Sasiela and J. P. Freidberg.....	703
Beam efficiency and gain optimization of antenna arrays with nonuniform spacings. J. K. Butler and H. Unz.....	711
Moment synthesis of array factors with nonuniform spacing and amplitude parameters. A. L. Maffett and T. B. Curtz.....	721
Electromagnetic scattering by thin inhomogeneous circular cylinders. Clayborne D. Taylor.....	729
Computation of HF ground backscatter amplitude. Thomas A. Croft.....	739
Radiation from dipoles in an idealized jungle environment. James R. Wait.....	747
John Howard Dellinger memorial lecture. Millett G. Morgan.....	751

No. 8—August

Preface to "Electromagnetic Wave Propagation in Anisotropic Media" papers. Leopold B. Felsen.....	i
Radiation of an antenna in a compressible magnetoplasma. Georges A. Deschamps and Oren B. Kesel.....	757
Ray optics for radiation problems in anisotropic regions with boundaries. I. Line-source excitation. Leopold B. Felsen and Shalom Rosenbaum.....	769
Ray optics for radiation problems in anisotropic regions with boundaries. II. Point-source excitation. H. L. Bertoni and A. Hessel.....	793
Transient radiation of an electrical dipole in a uniaxially anisotropic plasma. S. W. Lee and R. Mitra.....	813
Diffraction by a cylinder in a locally uniaxial medium with azimuthal optic axis. Henry J. Stalzer, Jr., and Jerry Shmoys.....	821
Scaling for rotationally symmetric potential in uniaxial media. George Eichmann.....	833
Aperture fields in an anisotropic medium. E. V. Jull.....	837
Electromagnetic plane wave scattering from a plasma-coated conducting cylinder. R. J. Mayhan and F. V. Schultz.....	853
Propagation of oblique electromagnetic waves through a warm plasma slab with normal magnetostatic field. B. R. Chawla, D. Kalluri, and H. Unz.....	869
Reflection of circularly polarized electromagnetic waves from an anisotropic plasma. M. P. Bachynski, B. W. Gibbs, and K. A. Graf.....	881
Propagation in nonuniform slightly gyrotropic media. Stanley H. Gross.....	893
Ionospheric wave theory using coupled vacuum modes. H. Poeverlein.....	905
Full wave solutions in terms of coupled vacuum modes. Edward J. Walsh.....	913
Biorthogonal expansions for the linearized anisotropic multifluid warm plasma equations. Maurice I. Sancer.....	927
Mode matching method for anisotropic guides. R. Mitra and S. W. Lee.....	937

No. 9—September

Interferometer phase and amplitude measurements for determining coherence ratio and wavefront correlation. Edward J. Fremouw and John M. Lansinger.....	947
Estimation of the number of unresolvable targets producing a single radar return. Petr Beckmann.....	955

Index to Volume 3

January-December 1968

A

	Page		Page
A sensitive technique for detecting late-time absorption following high-altitude nuclear explosions.....	964	Electromagnetic fields within a stratified earth produced by a long horizontal line source.....	387
Abbas, M., H. Poeverlein, Propagation of hydromagnetic waves in current carrying regions of the ionosphere and magnetosphere (parallel propagation).....	1010	Barrick, D. E., Review of scattering from surfaces with different roughness scales.....	865
Abel's solution for an isotropic ionosphere.....	163	Bates, C. F., R. Mitra, Waveguide excitation of dielectric and plasma slabs.....	251
Adams, R. A., Modified reflection coefficient for layered media.....	299	Bay-associated events, I, simultaneous magnetic field variations at the earth's surface and at synchronous equatorial distance.....	758
Admittance of infinite and finite cylindrical metallic antenna.....	607	Beamer, C. M., W. P. Birkemeier, H. S. Merrill, Jr., D. H. Sargeant, D. W. Thomson, C. T. Bergemann, Observation of wind-produced Doppler shifts in tropospheric scatter propagation.....	309
Aggarwal, A. K., M. S. Sodha, A. K. Arora, Nonlinear demodulation of an amplitude modulated wave in a plasma: elementary approach.....	1124	Bearing deviation in HF transionospheric propagation, I, exact computations for some ionospheric models with no magnetic field.....	1113
Akasofu, S.-I., C.-I. Meng, Polar magnetic substorms in the conjugate areas.....	751	Bearing deviation in HF transionospheric propagation, II, applications of exact computations.....	1119
Amitay, N., V. Galindo, Application of a new method for approximate solutions and error estimates to waveguide discontinuity and phased array problems.....	830	Behavior of the first normal modes and the lateral wave in a weak dielectric layer.....	1035
Analysis of the vector Kirchhoff equations and the associated boundary-line charge.....	141	Bergemann, C. T., W. P. Birkemeier, H. S. Merrill, Jr., D. H. Sargeant, D. W. Thomson, C. M. Beamer, Observation of wind-produced Doppler shifts in tropospheric scatter propagation.....	309
Analysis of spectra of atmospheric refractive-index differences.....	844	Bergeson, J. E., Radiation from an oscillating magnetic dipole in a streaming plasma.....	191
Analytic solution, general, for reflection from a sharply bounded anisotropic ionosphere.....	792	Biggs, A. W., Radiation from a horizontal electric dipole buried in a multilayer earth.....	869
Andersen, J. B., Admittance of infinite and finite cylindrical metallic antenna.....	607	——, Variable notch antenna patterns.....	599
Anisotropic ionosphere, a general analytic solution for reflection from a sharply bounded.....	792	Birkemeier, W. P., H. S. Merrill, Jr., D. H. Sargeant, D. W. Thomson, C. M. Beamer, C. T. Bergemann, Observation of wind-produced Doppler shifts in tropospheric scatter propagation.....	309
Antenna arrays, linear, random phase errors in end-fed.....	1132	Blair, W. E., Ionospheric diagnostics using resonances of an electric dipole impedance.....	155
Antenna, cylindrical, theory, Fourier transform method.....	1050	Blake, L. F., Comments on a paper "A note on the millimeter and submillimeter wave dielectric constant and loss tangent value of some common materials".....	975
Antenna, in a plasma medium, characteristic waves on an infinite cylindrical.....	1175	——, Ray-height computation for a continuous nonlinear atmospheric refractive-index profile.....	85
Antenna, metallic, admittance of infinite and finite cylindrical.....	607	Booker, H. G., C. M. Crain, Simple methods for calculating LF and VLF reflection loss in the disturbed lower ionosphere.....	775
Antenna patterns, variable notch.....	599	——, J. A. Fejer, K. F. Lee, Theorem concerning reflection from a plane stratified medium.....	207
Antenna radiation, from a scattering, embedded in a dissipative half space.....	577	Boundary theories for the resonance probe, an investigation of.....	319
Antenna radiation properties in presence of anisotropic plasmas.....	920	Boys, J. T., Statistical variations in the apparent specular component of ionospherically reflected radio waves.....	984
Antenna, tubular, the finite, in a warm plasma.....	901	——, H. A. Whale, Measurements of the coherence ratio of ionospherically propagated radio waves.....	977
Antennas, circular aperture array, density tapering.....	437	Breiden, K. H., A. P. Sheppard, A note on the millimeter and submillimeter wave dielectric constant and loss tangent value of some common materials.....	205
Antennas, spiral, surface waves and mode selection on multielement.....	267	——, Reply to L. V. Blake's comments.....	976
Aperture size and beam width, an uncertainty-type relation.....	471	Brown, R. R., Balloon observations of electron precipitation in conjugate regions of the auroral zone.....	705
Aperture synthesis in radar astronomy and some applications to lunar and planetary studies.....	491	Butler, J. K., Linear array synthesis for the best mean-square approximation of radiation patterns.....	447
Application of a new method for approximate solutions and error estimates to waveguide discontinuity and phased array problems.....	830		
Applications of exact computations, II, bearing deviation in HF transionospheric propagation.....	1119		
Approximate synthesis of HF backscatter considering ionospheric motions.....	57		
Arnold, R. L., T. W. Lezniak, G. K. Parks, J. R. Winkler, Measurement and intensity of energetic electrons at the equator at 6.6 R _E	710		
——, G. K. Parks, T. W. Lezniak, J. R. Winkler, Correlated effects of energetic electrons at the 6.6 R _E equator and the auroral zone during magnetospheric substorms.....	715		
Arora, A. K., A. K. Aggarwal, M. S. Sodha, Nonlinear demodulation of an amplitude modulated wave in a plasma: elementary approach.....	1124		
Array antennas, aperture, density tapering of circular.....	437		
Array as a space-time transducer.....	517		
Array optimization, spacing perturbation techniques.....	451		
Arrays, curvilinear.....	405		
Arrays, Dolph-Chebyshev, modified.....	459		
Arrays, equally spaced spherical.....	401		
Arrays, evidence of mode coupling on periodic traveling-wave.....	561		
Arrays, random periodic.....	425		
Arrays, synthesis of concentric ring antenna, yielding approximately equal side lobes.....	465		
Arrays, wideband, for radio astronomy.....	511		
Asymptotic anticipation method, numerical solutions of electromagnetic boundary value problems by means of.....	1158		
Atmosphere, clear, simultaneous radar reflectivity measurements and refractive index spectra in.....	991		
Auroral brightness fluctuations, characteristics of.....	650		
Auroral radio absorption, correlation, between conjugate points.....	698		
Axial slot, external admittance of an, on a dielectric coated metal cylinder.....	803		
Axial slot on a dielectric coated cylinder, radiation conductance of.....	391		

B

Bachynski, M. P., B. W. Gibbs, Antenna radiation properties in presence of anisotropic plasmas.....	920	Cables, coaxial, surface-wave modes in dielectric-lined.....	1167
Backscatter HF synthesis, considering ionospheric motions.....	57	Cain, J. C., Role of the main geomagnetic field in locating conjugate points.....	766
Bahar, E., Scattering of VLF radio waves in the curved earth-ionosphere waveguide.....	145	Calculations, exact ray, in a quasi-parabolic ionosphere with no magnetic field.....	69
Balloon observations of electron precipitation in conjugate regions of the auroral zone.....	705	Calculations, MUF, including the effect of the earth's magnetic field.....	53
Bannister, P. R., Electric and magnetic fields near a long horizontal line source above ground.....	203	Campbell, W. H., Rapid geomagnetic field variations observed at conjugate locations.....	726

INTERNATIONAL SCIENTIFIC RADIO UNION

Volume 3 (New Series)—January through December 1968
Papers 3-1-322 through 3-12-485

For sale by the Superintendent of Documents, U.S. Government Printing Office
Washington, D.C. 20402

Library of Congress Catalog Number: 66-60016

Contents of Volume 3

Volume 3 (New Series), No. 1, January 1968

	Page
Preface to the special issue on ray tracing. <i>Thomas A. Croft</i>	i
Ray tracing in the ionosphere. <i>John M. Kelso</i>	1
A comment on ray tracing in an anisotropic medium. <i>R. L. Smith</i>	13
Ray-tracing synthesis of ionogram observations of a large local disturbance in the ionosphere. <i>A. K. Paul, G. H. Smith, and J. W. Wright</i>	15
A ray-tracing program and its application to the computation of frequency deviations in a high-frequency signal. <i>H. H. Inston and A. R. Curtis</i>	27
Ray-tracing simulation of HF radio measurements of large traveling ionospheric disturbances. <i>David G. Detert</i>	33
Interpretation of anomalous oblique incidence sweep-frequency records using ray tracing. <i>Helmut Kopka and Hans G. Möller</i>	43
MUF calculations including the effect of the earth's magnetic field. <i>Helmut Kopka and Hans G. Möller</i>	53
An approximate synthesis of HF backscatter considering ionospheric motions. <i>W. J. Surtees</i>	57
Exact ray calculations in a quasi-parabolic ionosphere with no magnetic field. <i>Thomas A. Croft and Harry Hoogasian</i>	69
Exact ray-path solutions in a quasi-linear ionosphere. <i>Douglas E. Westover</i> ...	75
Exact ray computations in a tilted ionosphere with no magnetic field. <i>K. Folkestad</i>	81
Ray height computation for a continuous nonlinear atmospheric refractive index profile. <i>Lamont V. Blake</i>	85
A three-dimensional ray-tracing computer program. <i>R. M. Jones</i>	93
An evaluation of the ITSA 3-D ray-trace program. <i>Theodore J. Lemanski</i> ...	95
Ray-path equations for an ionized layer with a horizontal gradient. <i>Donald L. Nielson</i>	101
Predicting ionospheric electron density profiles. <i>George W. Haydon and Donald L. Lucas</i>	111

	Page
A conducting-slab model for electromagnetic propagation within a jungle medium. <i>David L. Sachs and Philip J. Wyatt</i>	125
Space correlations of 35-GHz transmissions over a 28-km path. <i>R. W. Lee and A. T. Waterman, Jr.</i>	135
An analysis of the vector Kirchhoff equations and the associated boundary-line charge. <i>Maurice I. Sancer</i>	141
Scattering of VLF radio waves in the curved earth-ionosphere waveguide. <i>E. Bahar</i>	145
Ionospheric diagnostics using resonances of an electric dipole impedance. <i>W. E. Blair</i>	155
Generalization of Abel's solution for both magnetoionic components in the real-height problem. <i>Adolf K. Paul and G. H. Smith</i>	163
On the theory of radiation from an annular slot in a compressible plasma. <i>Y. S. Yeh and James R. Wait</i>	171
Leaky-wave beams of multiply layered plasma media. <i>J. H. Harris</i>	181
Radiation from an oscillating magnetic dipole in a streaming plasma. <i>John E. Bergeson</i>	191
Comments on "Modal solution of a point source in a strongly focusing medium" by E. T. Kornhauser and A. D. Yaghjian. <i>R. Lang and J. Shmoys</i>	201
The electric and magnetic fields near a long horizontal line source above the ground. <i>Peter R. Bannister</i>	203
A note on the millimeter and submillimeter wave dielectric constant and loss tangent value of some common materials. <i>K. H. Breeden and A. P. Sheppard</i>	205

	Page
A theorem concerning reflection from a plane stratified medium. <i>Henry G. Booker, Jules A. Fejer, and Kai Fong Lee</i>	207
Whistler precursors. <i>T. Laaspere and C. Y. Wang</i>	213
A numerical study of VLF mode structure and polarization below an anisotropic ionosphere. <i>Richard A. Pappert</i>	219
Guidance in the magnetosphere along field-aligned irregularities. <i>Nicholas Gothard</i>	235
Propagation in a superrefractive troposphere with a nontrapping surface layer. <i>Irvin H. Gerks</i>	245
Waveguide excitation of dielectric and plasma slabs. <i>C. P. Bates and R. Mittra</i>	251
Surface waves and mode selection on multielement spiral antennas. <i>B. Ru-Shao Cheo and V. H. Rumsey</i>	267
Parametric properties of dielectric slabs with large permittivity modulation. <i>D. E. Holberg and K. S. Kunz</i>	273
Fluctuations of a Gaussian light beam propagating through a random medium. <i>Yasuaki Kinoshita, Michio Suzuki, and Tadashi Matsumoto</i>	287
Relativistic magnetoionic theory for drifting plasma. <i>H. Unz</i>	295
A modified reflection coefficient for layered media. <i>Roy N. Adams</i>	299
Differential microwave phase shifter. <i>J. E. Keys</i>	303
Oblique wave propagation in drifting isotropic warm plasma. <i>H. Unz</i>	305

	Page
Observation of wind-produced Doppler shifts in tropospheric scatter propagation. <i>W. P. Birkemeier, H. S. Merrill, Jr., D. H. Sargeant, D. W. Thomson, C. M. Beamer, and G. T. Bergemann</i>	309
An investigation of boundary theories for the resonance probe. <i>R. J. Kostelnicek</i>	319
Signal and noise characteristics in radiometric correlation detectors. <i>G. Joseph Buck</i>	325
Hydromagnetic wave instabilities in a nonneutral plasma-beam system. <i>I. Kimura and H. Matsumoto</i>	333
Crossed-dipole method of measuring wave tilt. <i>R. J. King</i>	345
Scattering of electromagnetic waves by field-aligned plasma columns. <i>Tetsuya Sato and Ken-ichi Maeda</i>	351
Surface wave propagation over a thin plasma layer on a ground plane. <i>W. C.-Y. Lee and C. H. Walter</i>	369
Demodulation of amplitude modulated RF waves in a plasma at resonance. <i>Nobuki Kawashima</i>	377
Gram-Charlier series distribution for foF2 and M(3000)F2. <i>M. M. Siddiqui and S. M. Ostrow</i>	383
Electromagnetic fields within a stratified earth produced by a long horizontal line source. <i>Peter R. Bannister</i>	387
Radiation conductance of an axial slot on a dielectric coated cylinder. <i>Charles M. Knop and V. Gyls</i>	391
A note on the groundwave phase velocity over a plane earth. <i>B. Segal</i>	397
Reply to "A note on the groundwave phase velocity over a plane earth" by <i>B. Segal, R. J. King and G. A. Schlak</i>	399

	Page
Preface to special issue on theory of antenna arrays. <i>M. T. Ma</i>	i
Equally spaced spherical arrays. <i>Andrew K. Chan, Akira Ishimaru, and Rubens A. Sigelmann</i>	401
Curvilinear arrays. <i>Bing Chiang and David H-S Cheng</i>	405
Theoretical study of dipole array of N parallel elements. <i>V. W. H. Chang and R. W. P. King</i>	411
Random periodic arrays. <i>Y. T. Lo</i>	425
Density tapering of circular aperture array antennas. <i>Henry W. Redlien, Jr.</i>	437
Linear array synthesis for the best mean-square approximation of radiation patterns. <i>J. K. Butler</i>	447
Spacing perturbation techniques for array optimization. <i>F. I. Tseng and David K. Cheng</i>	451
Modified Dolph-Chebyshev arrays. <i>B. L. J. Rao</i>	459
Synthesis of concentric ring antenna arrays yielding approximately equal side lobes. <i>M. T. Ma and Lillie C. Walters</i>	465
An uncertainty-type relation between aperture size and beam width. <i>Herbert Kurss</i>	471
A scattering matrix method for solving waveguide array impedance problems. <i>E. C. DuFort</i>	475
On the mismatch of electronically steerable phased-array antennas. <i>D. Varon and G. I. Zysman</i>	487
Aperture synthesis in radar astronomy and some applications to lunar and planetary studies. <i>T. Hagfors, B. Nanni, and K. Stone</i>	491
Wideband arrays for radio astronomy. <i>W. K. Klemperer</i>	511
The array as a space-time information transducer. <i>A. A. Ksienski</i>	517

	Page
A laboratory model for studying transhorizon radio wave propagation phenomena. <i>R. E. Post, M. R. Guidry, Jr., and D. F. Rost</i>	523
Fully developed turbulent irregularities in the ionosphere due to cross-field plasma instability. <i>Tetsuya Sato, Takao Tsuda, and Ken-ichi Maeda</i>	529
The double-peak distribution of the amplitude of the radio wave returned from the sporadic <i>E</i> layer. <i>S. R. Khastgir, S. Ganguly, and S. Samanta</i>	535
Pi events with particular reference to conjugate point phenomena. <i>J. A. Jacobs</i>	539
Identification of a new type of mode conversion interference in VLF propagation. <i>A. B. Kaiser</i>	545
Wave propagation in a random medium with stratified background. <i>C. H. Liu</i>	551
Evidence of mode coupling on periodic traveling-wave dipole arrays. <i>Richard B. Kiebert and David F-D. Sun</i>	561
General solution to the problem of reflection and transmission by a moving dielectric medium. <i>T. Shiozawa and K. Hazama</i>	569
Radiation from a scattering antenna embedded in a dissipative half space. <i>H. S. Tuan and Ronold W. P. King</i>	577
On the scattering of electromagnetic waves from a long wire. <i>Chin-Lin Chen</i>	585
Variable notch antenna patterns. <i>Albert W. Biggs</i>	599
Admittance of infinite and finite cylindrical metallic antenna. <i>J. Bach Andersen</i>	607
Rough surface scattering on a communication link. <i>Harold Staras</i>	623
Notes:	
Influence of a radial magnetic field on the resonances of a spherical plasma cavity. <i>David B. Large and James R. Wait</i>	633
Comments on the "Application of diffractions by convex surfaces to irregular terrain situations" by H. T. Dougherty and L. J. Maloney. <i>James R. Wait</i>	638
A note on the theory of end-corrections for thick monopoles. <i>David C. Chang and Tai Tsun Wu</i>	639

	Page
Preface to special issue on conjugate point symposium. <i>Wallace H. Campbell and Sadami Matsushita</i>	i
Conjugate effects of atmospherically scattered auroral electrons. <i>M. H. Rees</i>	645
Characteristics of auroral brightness fluctuations. <i>G. G. Shepherd and E. V. Pemberton</i>	650
Ionospheric F2 behavior at conjugate places in low latitudes. <i>S. Matsushita</i>	658
Most recent studies of low latitude effects due to conjugate location heating. <i>H. C. Carlson</i>	668
Presunrise heating of the ionosphere at Arecibo due to conjugate point photoelectrons. <i>M. W. Kwei and J. S. Nisbet</i>	674
Conjugate F-region enhancement related to the South Atlantic magnetic anomaly. <i>C. P. Pike, John R. Herman, and G. J. Gassmann</i>	680
A suggested conjugate point dependence for intense temperate latitude sporadic E. <i>Ernest K. Smith, Jr.</i>	687
Scintillation observations at medium latitude geomagnetically conjugate stations. <i>K. C. Yeh, D. Simonich, J. Mawdsley, and G. F. Preddey</i>	690
Correlation of auroral radio absorption between conjugate points. <i>J. K. Hargreaves and W. L. Ecklund</i>	698
Balloon observations of electron precipitation in conjugate regions of the auroral zone. <i>R. R. Brown</i>	705
Measurement and intensity of energetic electrons at the equator at 6.6 R_e . <i>T. W. Lezniak, R. L. Arnoldy, G. K. Parks, and J. R. Winckler</i>	710
Correlated effects of energetic electrons at the 6.6 R_e equator and the auroral zone during magnetospheric substorms. <i>G. K. Parks, R. L. Arnoldy, T. W. Lezniak, and J. R. Winckler</i>	715
Recent research on the magnetospheric plasmopause. <i>D. L. Carpenter</i>	719
Rapid geomagnetic field variations observed at conjugate locations. <i>Wallace H. Campbell</i>	726
Diffusion processes influenced by conjugate-point wave phenomena. <i>John M. Cornwall</i>	740
Spatial extent of geomagnetic events conjugate to Byrd. <i>J. K. Walker</i>	745
Polar magnetic substorms in the conjugate areas. <i>C.-I. Meng and S.-I. Akasofu</i>	751
Simultaneous magnetic field variations at the earth's surface and at synchronous, equatorial distance. Part I. Bay-associated events. <i>W. D. Cummings and P. J. Coleman, Jr.</i>	758
Simultaneous magnetic field variations at the earth's surface and at synchronous, equatorial distance. Part II. Magnetic storms. <i>P. J. Coleman, Jr., and W. D. Cummings</i>	762
The role of the main geomagnetic field in locating conjugate points. <i>Joseph C. Cain</i>	766
Conjugate optical measurements—total night hours possible for one year. <i>E. Marovich</i>	772

	Page
Simple methods for calculating LF and VLF reflection loss in the disturbed lower ionosphere. <i>Henry G. Booker and Cullen M. Crain</i>	775
Propagation of ELF and VLF waves below a generally anisotropic ionosphere. <i>Janis Galejs</i>	781
On the calculation of mode conversion at a graded height change in the earth-ionosphere waveguide at VLF. <i>James R. Wait and Kenneth P. Spies</i> ...	787
A general analytic solution for reflection from a sharply bounded anisotropic ionosphere. <i>C. H. Shetty</i>	792
Ray-tracing investigation of direction of arrival observations of HF radio waves. <i>N. Narayana Rao</i>	796
External admittance of an axial slot on a dielectric coated metal cylinder. <i>Charles M. Knop</i>	803
On waves circulating around a rigid cylindrical obstacle in a compressible plasma. <i>Frank M. Labianca</i>	818
Dielectric theory of E-M waves in turbulent media. <i>Leonard S. Taylor</i>	826
Application of a new method for approximate solutions and error estimates to waveguide discontinuity and phased array problems. <i>N. Amitay and V. Galindo</i>	830
Analysis of spectra of atmospheric refractive index differences. <i>A. W. Straiton, A. P. Deam, J. L. Dodd, and B. M. Fannin</i>	844
Scattering by an arbitrarily shaped conductor in uniform motion relative to the source of an incident spherical wave. <i>R. H. Ott and George Hufford</i> ...	857

Notes:

A note on the mathematical representation of the source for tubular transmitting antennas. <i>D. V. Otto</i>	862
A comment on "A note on the mathematical representation of the source for tubular transmitting antennas," by D. V. Otto. <i>Ronald W. P. King and Tai Tsun Wu</i>	864
A review of scattering from surfaces with different roughness scales. <i>Donald E. Barrick</i>	865
Radiation from a horizontal electric dipole buried in a multilayer earth. <i>Albert W. Biggs</i>	869
Radar interferometry measurements of a turbulent plasma. <i>D. E. Weissman, H. Guthart, and T. Morita</i>	874

Volume 3 (New Series), No. 9, September 1968

	Page
Quasi-monochromatic scattering and some possible radar applications. <i>J. L. Poirier</i>	881
Electromagnetic diffraction by a moving wedge. <i>G. N. Tsandoulas</i>	887
Near fields of a cylindrical antenna. <i>Janis Galejs</i>	893
The finite tubular antenna in a warm plasma. <i>A. David Wunsch</i>	901
Antenna radiation properties in presence of anisotropic plasmas. <i>M. P. Bachynski and B. W. Gibbs</i>	920
Ionospheric focusing for an antenna in the presence of the geomagnetic field. <i>D. Walsh and Herschel Weil</i>	936
VLF Electromagnetic radiation in a magnetoionic medium. <i>Martin Avery Snyder and Harold Weitzner</i>	943
Comparison of methods for calculating LF and VLF reflection coefficients. <i>Burt Gambill</i>	954
A sensitive technique for detecting late-time absorption following high-altitude nuclear explosions. <i>John R. Herman</i>	964

Notes:

Comments on a paper "A note on the millimeter and submillimeter wave dielectric constant and loss tangent value of some common materials" by K. H. Breeden and A. P. Sheppard. <i>Lamont V. Blake</i>	975
Reply to L. V. Blake's Comments. <i>K. H. Breeden and A. P. Sheppard</i>	976

	Page
Measurements of the coherence ratio of ionospherically propagated radio waves. <i>H. A. Whale and J. T. Boys</i>	977
Statistical variations in the apparent specular component of ionospherically reflected radio waves. <i>J. T. Boys</i>	984
Simultaneous radar reflectivity measurements and refractive index spectra in the clear atmosphere. <i>R. A. Kropf, I. Katz, T. G. Konrad, and E. B. Dobson</i>	991
Diffraction and scattering of the electromagnetic groundwave by terrain features. <i>James R. Wait</i>	995
Spectral parameters of the VLF radio noise observed as functions of the azimuth. <i>J. Frisius and G. Heydt</i>	1004
Propagation of hydromagnetic waves in current-carrying regions of the ionosphere and magnetosphere (parallel propagation). <i>M. Abbas and H. Poeverlein</i>	1010
Plane wave scattering from modulated corrugated structures. <i>A. Hessel and H. Hochstadt</i>	1019
Electromagnetic induction in a small conducting sphere above a resistive half space. <i>James R. Wait</i>	1030

Notes:

The behavior of the first normal modes and the lateral wave in a weak dielectric layer <i>John S. Nicolis and Samir Hoodbhoy</i>	1035
Radio propagation through New Guinea rain forest. <i>H. A. Whale</i>	1038

	Page
Subsurface radio propagation experiments. <i>Carson K. H. Tsao and J. T. deBettencourt</i>	1039
Scattering and absorption by short, thin metallic filaments. <i>R. J. Garbacz and G. A. Thiele</i>	1045
Fourier transform method in cylindrical antenna theory. <i>D. V. Otto</i>	1050
Scattering of electromagnetic waves from a tilted slightly rough surface. <i>G. R. Valenzuela</i>	1057
Wavelength dependence of microwave propagation far beyond the radio horizon. <i>Folke Eklund and Sture Wickerts</i>	1066
Horizon focusing effects observed on ionospherically reflected radio waves. <i>L. C. Humphrey</i>	1074
Latitude variation in VLF modal interference. <i>A. B. Kaiser</i>	1084
Calculation of phase errors in the frequency components of a (VLF) pulse using measured noise amplitude distributions. <i>E. A. Lewis and A. Ganio</i>	1091
Radiation from an oscillating source moving through a dispersive medium with particular reference to the complex Doppler effect. <i>K. S. H. Lee</i>	1098

Notes:

Higher order asymptotic terms of the two-dimensional diffraction by a small aperture. <i>A. Mohsen and M. A. K. Hamid</i>	1105
Relation between sunspot number and the ionospheric index <i>IF2</i> . <i>L. M. Muggleton and S. S. Kouris</i>	1109

	Page
Bearing deviation in HF transionospheric propagation. I. Exact computations for some ionospheric models with no magnetic field.	
<i>N. Narayana Rao</i>	1113
Bearing deviation in HF transionospheric propagation. II. Application of exact computations. <i>N. Narayana Rao</i>	1119
Nonlinear demodulation of an amplitude modulated wave in a plasma: Elementary approach. <i>M. S. Sodha, A. K. Arora, and A. K. Aggerwal</i>	1124
Random phase errors in end-fed antenna arrays. <i>D. G. Dudley</i>	1132
Electromagnetic scattering by a moving conducting sphere.	
<i>Robert C. Restrick, III</i>	1144
Scattering of electromagnetic waves from a slightly rough surface moving with uniform velocity. <i>G. R. Valenzuela</i>	1154
Numerical solutions of electromagnetic boundary value problems by means of the asymptotic anticipation method. <i>A. R. Neureuther and K. Zaki</i>	1158
Surface-wave modes in dielectric-lined coaxial cables. <i>J. E. Lewis and M. M. Z. Kharadly</i>	1167
Characteristic waves on an infinite cylindrical antenna in a plasma medium. <i>Edmund K. Miller</i>	1175
Note: On the diffraction by a knife-edge obstacle on a conducting earth. <i>James R. Wait and Kenneth P. Spies</i>	1179
Errata: General solution to the problem of reflection and transmission by a moving dielectric medium. <i>T. Shiozawa and K. Hazama</i>	1182
Radio Science reviewers (1966-1968).....	1183
Cumulative tables of contents (1959-1967).....	1184
Index to volume 3, January-December 1968.....	1195
Contents of volume 3, January-December 1968.....	ii
